MINTERRORNEWS MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our 19th year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,300 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Over the last 20 years with the advent of the internet millions of collectors have flocked to online auctions and dealer websites. Many people connect to various online forums and clubs to share knowledge and learn about Mint Errors. Everyone, including dealers, collectors and even investors have instant access to information as never before. The Mint Error market has experienced an explosion in collector interest over the last 20 years.

Time and again, rare and unique Mint Errors in the numismatic market have made headline news. Authentication and certification of Mint Errors is now commonplace. In 1991, ANACS was the first to authenticate, grade and encapsulate major Mint Errors. In 1999, PCGS and NGC began certifying Mint Errors. Major Mint Errors are now pursued, collected and traded just like patterns, territorial Gold, colonials and other interesting segments of numismatics.

In 1975, I purchased a 1900 Indian Head Cent struck on a \$2 1/2 Indian Gold blank planchet for \$7,750 at a major coin auction. That price ranked among the top five ever realized for a Mint Error that few dealers or serious collectors would even consider. At that time price guides for Mint Errors were nonexistent and today that Indian Head Cent struck in Gold is certified MS65 by PCGS and is valued at six figures.

Heritage Auctions is the largest collectibles auctioneer and third largest auction house in the world, as well as the largest auction house founded in the U.S. We are also the undisputed Internet leader in our field, with more than 1 million online bidder-members registered on HA.com. This loyal and growing community of collectors is a testament to the usefulness of our website, our reputation for professional business practices and our vast expertise in the field of art and collectibles.

Established in 1976, Heritage offers a wide range of U.S. & World Coins, Rare Currency and more.

Dave Camire is considered an authority on modern minting technology and production, specializing in mint errors and Chinese coins. He has visited many mints, both domestically and internationally, which is not only insightful but useful in his role as NGC Modern World Coin Grader and Finalizer. His knowledge of the minting process is helpful in distinguishing mint defects from damaged coins and establishing a coin's authenticity and grade.

Dave co-authored 100 Greatest U.S. Error Coins and has contributed to such numismatic publications as Coin World (honored with being listed as one of the 100 Most Influential People), COINage, Numismatic News, The Numismatist and the Red Book. He has been featured on National Public Radio (NPR) and seen on Good Morning America and the Discovery Channel.

Dave Camire

Dave is also President of Numismatic Conservation Services (NCS). With his knowledge and expertise in coin conservation, he has been an active volunteer at the Smithsonian Institution's Museum of American History, helping to preserve the National Numismatic Collection and establishing key numismatic displays at the museum. A collector at heart, he has been collecting since he was 13 years old.

Dave Camire is a Consultant to Mint Error News for Mint Errors, Patterns and Die Trials.

Ron Guth is a recognized authority on United States and German coins. He is a licensed Certified Public Accountant who has been involved professionally in numismatics for over fifty years as a collector, dealer, researcher, and writer. His books and articles have earned numerous awards, including the American Numismatic Association's Heath Literary award and the Olga & Wayte Raymond awards, the Numismatic Literary Guild's Best Numismatic Investment Book and Best Book of the Year awards, and the Professional Numismatic Guild's Best Book of the Year award. In 2003, Ron received the prestigious President's Award from the American Numismatic Association in recognition of his numerous contributions to numismatics. In 2021, Coin World named Ron as one of the Top Ten Most Influential People in Numismatics for the sixty-year period from 1960-2020.

Ron Guth

Ron created the CoinFacts website (now PCGS CoinFacts) in 1999 and sold the website to Collectors Universe in 2004 (where it is now presented as PCGS CoinFacts. Ron served in various capacities at Collectors Universe, including Director of Numismatic Research, President of the Professional Coin Grading Service, and President of PCGS CoinFacts.

Currently, Ron serves as proprietor of GermanCoins.com and as Chief Investigator at the Numismatic Detective Agency, where he provides expert provenance on high-end coins. Ron Guth is a Consultant to Mint Error News for Patterns and Die Trials.

Mike Faraone

Mike Faraone is the owner of Mike Faraone Rare Coins in Las Vegas, Nevada. He previously was a grader at PCGS for 12 years after 11 years at ANACS.

He has taught grading at the ANA Summer Seminar for twenty years. Mike has lectured on Mint errors and Counterfeit protection at numerous coin shows across the country. He is a previous president of the National Silver Dollar Roundtable and served as editor of the NSDR Journal for over twenty years. Mike can be reached via e-mail at: mfaraone@hotmail.com.

Mike Faraone is a Consultant to Mint Error News for Mint Errors, Patterns and Die Trials.

Marc Crane

Marc Crane is a dealer specializing in rare U.S. coins and U.S. patterns. He started Marc One Numismatics, Inc. in 1991. He is a member of the PNG (#565).

Marc tied for 1st place in a PCGS grading contest and is considered a world-class grader and authenticator. He is a contributor to the Red Book and is permanently listed in the pattern section. His coin store in Rancho Mirage, CA is open to the public and he regularly attends coin shows and auctions across the country.

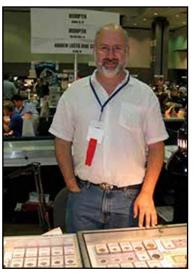

Marc Crane is a Consultant to Mint Error News for Patterns and Die Trials.

Andy Lustig has been dealing in U.S. and World Coins since 1975 and has attended more than 2,000 coin shows and auctions.

Andy is the co-founder of the Society of U.S. Pattern Collectors (uspatterns.com). He has been a member of the Professional Numismatists Guild (PNG #614) since 2005. He is a member of NGC and was also a former grader and authenticator for PCGS.

Andy was a speaker at the annual CSNS convention, presenting "Collecting Pattern Coinage." Andy was a major contributor to the 8th Edition of the Judd book.

Andy Lustig is a Consultant to Mint Error News for Mint Errors, Patterns and Die Trials.

Andy Lustig

Saul Teichman

Saul Teichman is a co-founder and primary contributor/editor of the Society of U.S. Pattern Collectors (uspatterns.com) as well as contributor to the 8th Edition of the Judd book and Andrew Pollock's *United States Patterns and Related Issues* as well as many other books. He has been collecting primarily off-metal U.S. Mint errors for over 20 years and maintains extensive pedigree information for many error issues which have been published here in the past.

Saul Teichman is a Consultant to Mint Error News for Mint Errors, Patterns and Die Trials

Rare Coin Wholesalers has the largest inventory of U.S. Rare Coins.

Founded in 2001, Rare Coin Wholesalers has transacted over \$2 billion in U.S. rare coin business and is a recognized leader in acquiring, managing, and selling U.S. rare coins positioned for wealth preservation and capital growth.

Steven L. Contursi is a Consultant to Mint Error News for U.S. Patterns.

Steven L. Contursi

Jeff Ylitalo

Jeff Ylitalo has collected Mint Error coins since 1993. He has avidly researched & written about this area of numismatics since 2006 contributing dozens of articles to CONECAs bi-monthly publication ErrorScope and Mint Error News. Jeff is the former editor for the ErrorScope 2008-2017.

Jeff's research and collecting focus is now primarily centered on World Error coins. Jeff can be reached via e-mail at: jylitalo@yahoo.com.

Jeff Ylitalo is a Consultant to Mint Error News for Mint Errors.

John Wang is an avid numismatic researcher and collector. His research focus is on absolute rarities including patterns, mint errors and exonumia, with particular interest in coin census, pedigrees, coin designers and minters. A historian at heart, John enjoys tracing coins and people through time.

John writes for Mint Error News, the So-Called Dollar Fellowship and Wikipedia. He is also a top contributor to Collectors Universe Message Forums. Beyond writing, John enjoys creating coins, including cocreating a 2021 Morgan Dollar commemorative with Moonlight Mint, and inspiring a Frank Gasparro Liberty Dollar pattern design commemorative with Grove Minting Company. A collector at heart, John maintains a set of So-Called Dollar rarities in the PCGS Set Registry. John is founder and editor at PrivateMintNews.com.

John Wang

John Wang is a Consultant to Mint Error News for Mint Errors and Patterns.

Fred Weinberg

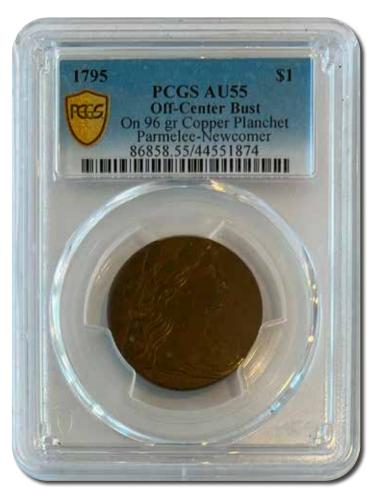

Fred Weinberg is a highly respected numismatist, with 40 years of full time experience in the rare coin marketplace.

He deals in numismatic United States Gold & Silver coinage, as well as specializing in buying & selling Major Mint Error coinage of all types.

He is one of the original 31 dealers selected as an authorized PCGS (Professional Coin Grading Service) dealer at it's inception in 1986.

Fred Weinberg has now retired and was a Consultant to Mint Error News for Mint Errors and Die Trials.

by Mike Byers

his is one of the most spectacular and amazing United States numismatic rarities of all time. I have been a full time rare coin dealer for close to 50 years and have handled many unique, famous and expensive coins, since this is my speciality. A few spectacular mint errors that I have handled include the unique gold Buffalo Nickel, several gold Indian Head Cents, several 1943 copper Lincoln Cents, the unique 1942 aluminum proof Cent, and the unique 1851 \$20 struck on a Large Cent planchet. I have also handled many unique and spectacular gold coins including the unique 1907 \$20 St. Gaudens matte proof, the unique 1908 \$20 St. Gaudens satin proof, the unique 1843 Dahlonega \$5 Liberty Specimen, and the unique 1873 \$5 Closed 3 Specimen.

This unique 1795 Small Eagle Dollar was struck on a 96 grain copper planchet. Certified by PCGS as AU 55, it still retains much luster and is absolutely stunning. In my professional opinion, this 1795 Small

Eagle Dollar was struck on a half cent planchet. This scenario seems most logical since the weight of 96 grains falls between the two weights of early dated half cents, 84 grains and 104 grains. Early half cents are known to have different weights and even the Red Book states that "the figures given are statutory. Actual weights will vary."

The pedigree is among the most complete ever, passing from several world class famous collections from 1863 to 1975. The last time that this 1795 Draped Bust Dollar in Copper sold in public auction was almost 50 years ago in a Stack's auction in 1975. Since then, it has remained in a private collection.

This unique rarity just surfaced and was immediately sold in the mid six-figure range to a collector who has an extensive collection of United States rare coins. Whether this is a mint error, pattern or die trial, it clearly transcends any specific category and would be treasured by any collector or numismatist.

Here is the listing of this Unique Copper Draped Bust Dollar on uspatterns.com including the pedigree and analysis:

uspatterns.com

P34

This famous piece is a 1795 draped bust silver dollar from dies not known to be used on any regular issue silver pieces. It is struck on a 96 grain copper

planchet (per PCGS) with the diameter of a Large Cent, and is from dramatically rotated dies.

The piece is unique and is ex Woodward 4/1863, Parmelee (New York Coin & Stamp 6/1890), Woodside (New York Coin & Stamp 4/1892), Woodin-1914 ANS, Newcomer, Boyd, Kosoff 7/1951 Numismatic Gallery Monthly, Kosoff 5/1955, Hydeman-Kosoff 3/1961, Stacks 5/1975, private collection, Lustig, Byers, private collection. It is graded PCGSAU55.

Various explanations for the coin's existence have been proposed. Adams and Woodin listed it as AW18 and called it a die trial piece. Judd listed it as a mint error. (Now under review.) Stack's called it a "setup trial piece to insure (sic) the striking distance between the obverse and reverse dies" in their 5/75 sale. (Saul Teichman disagrees because it is not as thick as a dollar planchet. He also notes that the Mint was able to create full size dollar planchets in copper for the 2 1794 dollars J18/P27 and J19/P28, and that all other die trials of this year are full-sized as well). Andy Lustig argues that it is either a die trial on an undersized planchet, a die trial on a full size copper planchet that was later cut down for use as a large cent planchet, or (most likely) a mint sport that could have been struck anytime from 1795 to 1863.

Now Residing in a Private Collection

This Unique Copper Draped Bust Dollar is the plate coin in the Adams & Woodin reference book United States Pattern, Trial, and Experimental Pieces (which was the precursor to the Judd reference book):

This Unique Copper Draped Bust Dollar was also listed in the fifth edition of the Judd reference book almost fifty years ago:

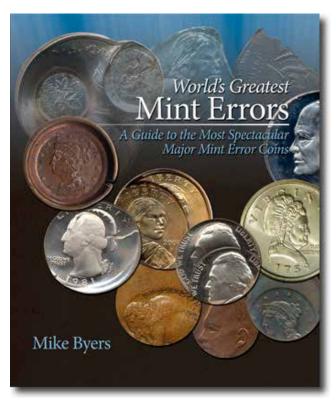

1795—DOLLAR of 1795 on a cent planchet. (A-W 18) shows centers of the obverse and reverse dies; no legends, only tips of date visible. Unique.

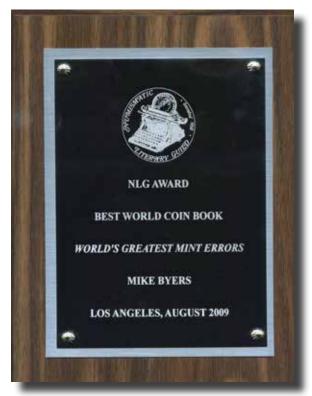

This group of unique and extremely rare United States coinage in copper is from the Parmelee Collection.

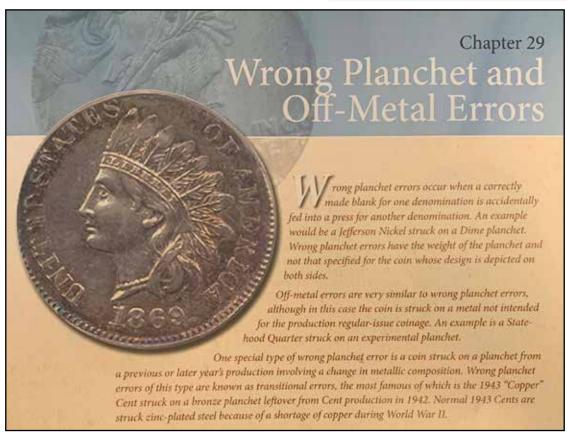

The Parmelee Plate 1 coin 14 is this Unique Copper Draped Bust Dollar.

Wrong Planchet and Off-Metal Errors are featured in my NLG Award winning book, World's Greatest Mint Errors.

by Mike Byers

(Long Beach, California) June 29, 2022 - A Unique GOLD Buffalo Nickel has been sold by Mike Byers Inc for \$400,000 to the JDG Trust, owner of several #1 ranked PCGS registry sets of Buffalo Nickels. Here are images as well as the original Mint Error News article on this Unique GOLD Buffalo Nickel.

s amazing as it sounds, this is a 1913 Buffalo Nickel struck on a U.S. \$5 Gold planchet. This unique discovery surfaced in 2019 and was previously unknown to the numismatic community. Struck during the era of the five known world famous 1913 Liberty Head Nickels valued at millions each, this unique Gold Buffalo Nickel is either a mint

error or a *piece de caprice*. It was likely made for a Mint official or a famous numismatist. It also could have been struck for presentation purposes but is not listed in Judd as a pattern.

The only comparable U.S. coins struck in gold, and not in their official adopted medals (copper, nickel, silver) are the following:

- (6) known Indian Head Cents struck on \$2½ gold planchets. Two of these sold in public auction for \$253k and \$276k, and I personally sold one at \$300k. These are well documented with famous pedigrees. The 1900 in MS 65 PCGS that I sold for 300k was formerly in the collections of B.G. Johnson and Colonel Green.
- (2) known 1915 Pan Pac Half Dollar struck over \$20 St. Gaudens gold coins, one realizing \$460k in a Heritage Auction. These are commemorative Half Dollars struck over U.S. \$20 gold coins that are very famous and listed in the Judd reference book.

According to Taxay and mentioned in the Judd Book, there exists a 1915 Lincoln Cent struck on a \$2 1/2 Indian planchet. Owned by famed numismatists B.G. Johnson and Colonel Green. Supposedly it was subsequently sold to J.V. McDermott of the 1913 Liberty Nickel fame.

12 specially minted 22 karat gold Sacagawea Dollars flew in Space on the Space Shuttle Columbia. Originally 39 were struck by the U.S. Mint but 27 were destroyed. After flying in space, these 12 gold Sacagawea Dollars are stored at the Fort Knox Bullion Despository and numismatists value these at \$1 Million each.

Originally discovered by Silvano DiGenova, a well known coin dealer in Laguna Beach, CA, who brought it to my table at the 2019 Long Beach coin show for me to examine and authenticate. It was raw and naturally I was in a state of shock examining it closely. The coin still retained considerable original luster, almost exhibiting a matte surface. Here was an unknown Gold Buffalo Nickel, slightly circulated with a test cut on the reverse, indicating it had been struck on a solid gold planchet.

Although it is impossible to know for sure, the test cut was probably made decades ago before the formation of coin grading companies and the technology to analyze a coin non-invasively. Test cuts were often made on older coins to determine their metal content.

My conclusion was that it was unquestionably authentic, so Sil and I had Fred Weinberg examine it next at his table. At the time, Fred was the PCGS consultant for mint errors and he agreed that it was authentic

and a spectacular discovery. Sil then submitted it to PCGS and they authenticated it but chose not to grade it due to the test cut.

This surprised me due to the fact that several well known U.S. coins (rare and special patterns, die trials and mint errors) have been certified by PCGS and NGC in regular holders, rather than net graded with details, due to their unique circumstances. A few examples include the unique cancelled 1860 Seated Liberty Half Dollar Pattern in Copper (Judd-269), the unique cancelled 2011-2013 Martha Washington Quarter Test Piece (Judd-2225), the unique 1814 platinum Bust Half (Judd-44a) with punch marks and graffiti, and the Dexter 1804 Dollar with a counterstamp "D" that is worth several million dollars.

It seemed to me, along with other experts that I consulted with, that this unique Gold Buffalo Nickel with a test cut, properly belonged in a regular holder, certified by PCGS or NGC.

Sil placed this Gold Buffalo Nickel in a Heritage Auction, where it realized a shockingly low \$78k, due to being in a PCGS "authentic but ungradable" holder. The dealer who purchased it immediately split it with me at his cost as I believed that it was an incredible bargain even in the PCGS holder.

I submitted it to NGC to be examined and potentially certified with a grade in a regular holder. NGC concluded that the test cut did not prevent this Gold Buffalo Nickel from being certified and graded in a regular holder. Now in a NGC AU 53 holder, it is being publicized in Mint Error News and commands the awe and respect of being a unique U.S. gold coin.

I have handled 3 of the 6 Gold Indian Head Cents. But handling this unique Gold Buffalo Nickel is certainly a highlight in my career and it belongs in the finest collection of major mint errors, unique coins or Buffalo Nickels.

Here are a few quotes from well respected numismatists who examined this unique discovery:

"The GOLD BUFFALO nickel ranks at the top of my list of the BEST error coins I have ever seen! When I finally get to writing the second edition of the Whitman 100 Greatest U.S. Error Coins, this will certainly be an addition."

- Dave Camire

"A fascinating coin. One has to wonder whether it was created by the same person(s) who made the five 1913 Liberty nickels." - James Halperin

"When the coin was first shown to me at my table at the Long Beach coin expo, I was stunned and immediately felt that it could be genuine just from visually looking at it. After spending some time and using high magnification I felt very confident that it was genuine and an incredible coin that none of us ever thought existed."

- Fred Weinberg

"When I first saw the gold Buffalo Nickel I was mesmerized by it. I wondered if it was actually a unique pattern struck in gold. Whether it is a pattern or mint error, it is truly an amazing coin."

- Silvano DiGenova

"A gold Buffalo Nickel is the perfect example of a coin that lies right on the line between something so cool that someone at the Mint would have had to have struck one, and so ridiculously impossible that nobody would have had the nerve to actually do it. Well, here we are!"

- Andy Lustig

"The unique gold buffalo nickel is an incredible coin and an amazing discovery, being discovered in 2019, over a century after its creation. I immediately thought that it ranks among the top US Mint rarities and, as such, should be straight graded. It's wonderful to have NGC recognize the importance of this coin by authenticating and grading it as AU53. The fame and stature of this coin will only grow over time."

- John Wang

"The 2008 \$10 buffalo and the 2016 centennial non-buffalo issues are the coolest modern issues because they invoke this fantasy of the real issue, the old original coin in gold which has always been dreamt of. Collectors love these modern U.S. Mint dreams. When Sil DiGenova shared his 'out of this world' unique discovery GOLD Buffalo, collectors and dealers everywhere were amazed, proud and envious all at once! A striking piece de caprice at the introduction of the second type in 1913. Wow!"

- Marc Crane

"The Gold 1913 Buffalo Nickel immediately brought to mind 'will wonders never cease?' After decades in the coin business, very little surprises me, but this was a bolt out of the blue!"

- Ron Guth

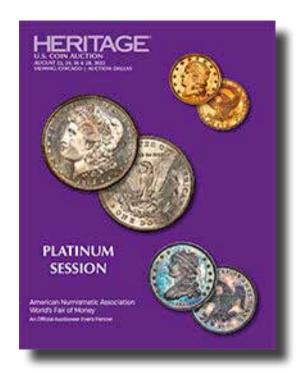

Remarkable Performance. Personalized Transactions.

Unique Double Eagle Reverse Hub Trial in Lead

by Mike Byers

Unique Double Eagle Reverse Hub Trial in Lead

This is a unique \$20 Double Eagle reverse hub trial attributed to 1857. It is listed as Judd # A1857-6 and is plated in the Judd reference book. Although authenticated and certified MS 62 by PCGS as a die trial, it is actually a hub trial. It is virtually as struck and is very dramatic and large, weighing 35 grams. This hub trial has a very famous pedigree including Nagy, Judd, Kosoff and Weinberg.

This hub trial features a heraldic eagle with a large ornamental shield, holding a scroll in its beak and an olive branch in its talons. The other side has portions of a wreath showing.

According to Saul Teichman of USPatterns.com, the design was "not used on any patterns that I am aware of. It is possibly the work of Anthony C. Paquet but that is uncertain."

From 1849 through 1908, this is the only known \$20 Double Eagle die trial or hub trial struck in lead. It belongs in a collection of U.S. Patterns, \$20 Double Eagles or unique numismatic rarities.

Wholesale vs. Retail vs. Auction

by Andy Lustig / uspatterns.com

here is much confusion as to how coins are valued. Because the market for patterns is more thin and erratic than the markets for most other coins, the confusion is even greater for pattern collectors.

The following framework for defining values may be helpful:

Retail – This is the highest price that a specific dealer will quote non-dealers. The potential buyer may be a knowledgeable collector, a novice or an investor.

High Wholesale – This is the price that a specific dealer will pay if he has a customer lined up for the coin, or if he at least has a pretty good

Wholesale vs. Retail vs. Auction

idea where he can profitably resell the coin on a retail or discounted retail basis.

Low Wholesale – This is the price that a specific dealer will pay to stock a coin, i.e. without having a specific customer in mind for the coin.

Naturally, each dealer will have his own opinion as to what the retail and wholesale values are for each given item. It would not be unusual for one dealer to quote his high wholesale price to another dealer, thinking that that was a good place to begin negotiations, and for that other dealer to consider the price exorbitant and in excess of retail. Conversely, many of us have at one time or another happily paid a dealer's retail quote, knowing that the coin was actually a bargain.

That said, assuming that the buyer and seller agree on the value of a coin (an unusual situation, but it happens), one would expect many dealer-to-collector sales take place between high wholesale and retail prices. Similarly, many dealer-to-dealer sales would take place between low wholesale and high wholesale prices.

So what about auctions? The answer here is far more confusing.

At an auction, there may be any number of dealers, collectors and investors vying for each coin. Each of the bidders has estimated the value of the item, and each has decided how aggressive he wants to be in pursuing the lot. Some bidders will refuse to bid on a lot unless they can "steal" it, other bidders may be willing to pay way over "retail" for the privilege of ownership. I.e., each bidder will, based on numerous considerations, determine a bid on the continuum between zero and infinity.

Wholesale vs. Retail vs. Auction

Things become even more convoluted, however, the as auction progresses. **Potential** bidders may run out of money, or they may just "chicken out". Conversely, bidders may succumb to "auction fever", increasing their bids out of frustration, enthusiasm, and/or an increased level of confidence brought about by seeing other people bidding. In short, bidders' predetermined bids often do not equal their actual bids, and their actual bids reflect far more than their appraisal of the coins "market" value. Two of the most commonly heard lines in an auction room are "That was cheap!" and "Why did I buy that?"

Allow me to make one last observation about auctions. When a lot is hammered down, we rarely know how high the winner was going to go. All we know is where the second highest bidder was willing to go. If a lot is sold for \$5000, but the highest bidder

would have gone to \$20,000, what is the lot worth?

The answer is that it depends. If you're the consignor, we know the answer: \$5000, less commissions to the auctioneer. If you're the second highest bidder: about \$5000. What if you're the highest bidder? Could be a lot of different numbers. If you're a dealer, you might come to realize that you made a mistake when you figured the lot, and be happy to break even. You might be convinced that you were right, but find that the publication of the price realized will make it difficult for you to resell the item for a big profit. You might stick to your guns and get a big profit, especially if you can find a buyer who didn't attend the auction. Or you might be lucky enough to already have a customer waiting to buy the coin for \$25,000.

So, what's it worth?

BY DAVID J. CAMIRE
NCS PRESIDENT AND NGC FINALIZER

The coin's whereabouts have been a mystery since 1973, when it made history as an error sold by the Mint.

I was too young to participate in the first General Services Administration (GSA) sales when they began in 1972. Most of the sales consisted of Carson City Silver Dollars (over 1.5 million dating 1882, 1883 and 1884). They were sold through seven public mail bid auctions to the highest bidder (beginning in 1972 through 1980), with an initial minimum bid of \$30 per coin.

These coins had been stored for years at the US Treasury Building in Washington, DC in canvas bags, each containing 1,000 coins. The coins were moved in 1972 to the West Point US Silver Depository. (Opened in 1938 and located in West Point, New

York, it would not become an official US Mint branch until 1988.) All of the bags were then opened, inventoried and evaluated.

During the evaluation process, a handful of "oddities" (as mint errors were often called back then) were discovered. But one was "eyecatching" — an 1882-CC that was struck off-center! It was referred to as the "Grand Snake" by Mint technicians. The terminology used internally by the Mint does not always correspond directly to what is used in the numismatic/collecting community. Thus, a "snake" coin is referred to as an off-center by collectors.

1882-CC GSA Morgan Dollar Struck 15% Off Center graded NGC MS 65 and pedigreed as "The Grand Snake" mint error

1882-CC GSA Morgan Dollar Struck 15% Off Center graded NGC MS 65 and pedigreed as "The Grand Snake" mint error

Normally, these coins would be destroyed as they did not meet the Mint's technical requirements. Additionally, never had the US Mint ever sold a mis-strike (and for a profit)! The dilemma: what should be done with these error coins. Afterall, these were now historic artifacts over 90 years old.

The decision was made to sell the majority of these "oddities" along with all of the rest of the coins, but without any description or mention of the error except for the off-center. This coin would include a message informing the purchaser that the coin was different, a mint error and worth more than the other coins. The final step was to sonically seal each coin in a plastic case that was enclosed in a blue cardboard display box with official paperwork describing the coin.

The sale commenced on January 31, 1973, the coin was sold and, for one lucky random bidder, they were about to win the lottery!

Shortly after the sale, the new owner did come forward. It was Tom Reneke of Astoria, Oregon. He had indeed paid

\$30 for the 1882-CC Off-Center GSA Morgan Dollar. Initially, he was offered \$2,000 for the coin by Fred Weinberg of Numismatics, Ltd. The offer from Fred was not acted upon, and it is not known what offer he accepted or when he sold the coin. However, from this point in time until earlier this year, the coin simply vanished from public sight.

What we can then loosely piece together is the following history of the coin. It subsequently sold, presumably, to a local dealer in the Oregon area. It was then resold to a private collector of GSA material and held in this collection for the past 20 to 30 years. Jack Kelly of the famed "The Toneddollars Collection" then acquired the coin, where it remained until being sold this year to the current owner, who wishes to remain anonymous.

When I was writing the "100 Greatest U.S. Error Coins" book, along with Fred Weinberg and Nick Brown, we searched exhaustively for this coin. We wanted to include it, but one of our criteria for inclusion was a high-definition photo of the coin, which we could not obtain. In fact, we could not

find anyone who had any information on the current whereabouts of the coin. It was truly lost to history for almost 50 years... until now. Mystery solved!

The coin was recently submitted to NGC for authentication and grading. To date, this coin is unique in two ways: It is the farthest-known-off-center Carson City Morgan Dollar and the only one in a GSA holder. Personally, the chance to finally see and hold the coin was especially thrilling!

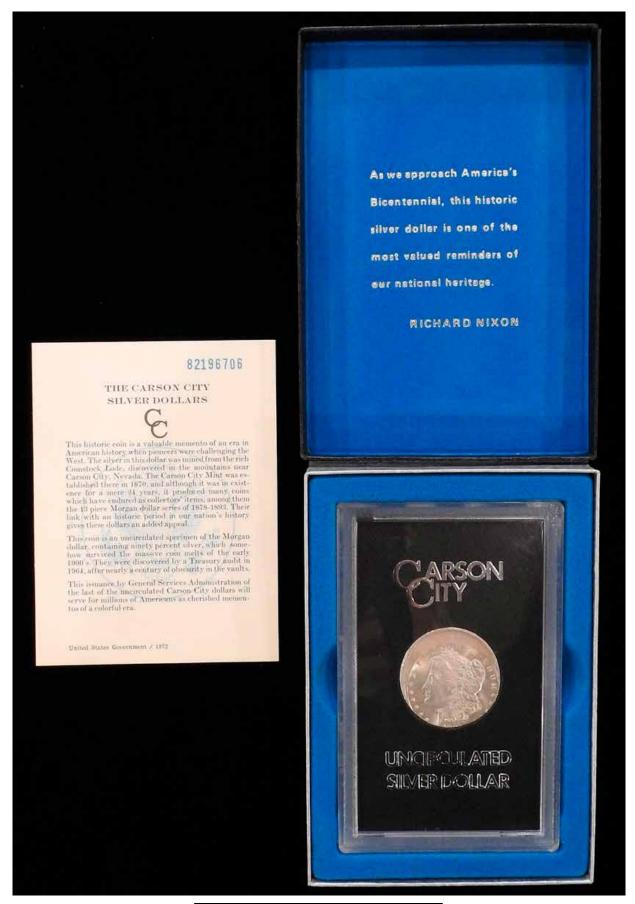

I recently called Fred Weinberg to update him on the coin and to get his thoughts on it. Here is what he had to say: "When we were shown this Off-Center Carson City Dollar at the West Point Depository in early 1973, I couldn't take my eyes off it. It was simply a magnificent example of an Off-Center Morgan Dollar, but the first I had ever seen or heard of from the Carson City Mint. (I was not even 23 years old!) Over the past 50 years, I always hoped that it would surface, and I could buy it, but it never came up on the market."

The new owner, upon receiving the coin

back, had this to say: "The first time I became aware of the coin, I knew it was something remarkable and unique that I needed to make every effort to add to my collection. With all of the history and mystique of the Carson City Mint, the legacy of the GSA sale and the magic of coins left untouched in their original government holders, the unique provenance of being included in the GSA sale as a significant error coin (and being used to help promote the first wave of sales to the public in 1973), and then just the dramatic eyeappeal of the coin itself; it just checked so many boxes that I had to have it."

NGC Chairman Mark Salzberg was also captivated by the coin and commented: "The NGC team was thrilled to have the opportunity to see this coin! Carson City Mint Silver Dollars have become increasingly popular over the years, and this particular coin is an incredible example."

What a treat it was to see this coin, even if it was just for a short time. But who knows? Maybe I can convince the new owner to display it at an upcoming show. Fingers crossed.

by Christopher Talbot Frank, CTF Error Coins

This discovery piece is the only known bowtie clip on a modern Jefferson Nickel struck between 2006-2022. PCGS graded this coin "MS61 Struck on Bowtie Web Scrap 1.13 grams." A bowtie has 4 clips and the shape of a bowtie. Coins struck on scrap coin webbing are extremely rare. The US Mint put in machinery and

policies in 2002 to reduce if not eliminate error coins from being released from the mint and coin rolling companies. This makes this modern struck bowtie even rarer.

Mint Error News Price Guide

- Updated August 2022 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated August 2022)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Broadstrikes (Updated August 2022)

A struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Partial Collars (Updated August 2022)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes (Updated August 2022)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Bonded Coins

(Updated August 2022)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Struck Fragments

(Updated August 2022)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000

Mated Pairs (Updated August 2022)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an

obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Transitional Errors (Updated August 2022)

Astruck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

U.S. Gold Errors (Updated August 2022)

Agior mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center

Indents (Updated August 2022)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated August 2022)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated August 2022)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated August 2022)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages (Updated August 2022)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes (Updated August 2022)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% offcenter to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated August 2022)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Off-Metals

(Updated August 2022)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Counterbrockages

(Updated August 2022)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Fold-Over Strikes (Updated August 2022)

Afold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated
Indian Cent Memorial Copper	\$1,000	\$1,250	\$1,250	\$1,500
Lincoln Cent Memorial Zinc	\$750	\$1,000	\$1,000	\$1,250
Jefferson Nickel	\$2,500	\$3,000	\$3,000	\$4,000
Roosevelt Dime Silver	\$4,000	\$5,000	\$5,000	\$6,000
Roosevelt Dime Clad	\$3,000	\$3,500	\$3,500	\$4,500
Washington Quarter Silver	\$4,000	\$5,000	\$5,000	\$10,000
Washington Quarter Clad	\$3,500	\$4,000	\$4,000	\$5,000
State Quarter	\$5,000	\$6,000	\$6,000	\$8,500

Martha Washington Test Pieces (Updated August 2022)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, "the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper."

Mike Byers' discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000
Martha Dollar (Sac Planchet)	\$6,000	\$7,500	\$10,000

MIKEBYERS.COM U.S. & WORLD MAJOR MINT ERRORS

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

- All coins must be certified by PCGS or NGC and have a minimum value of \$5,000 each. All U.S. Mint Errors must be dated prior to 2002.
- Each item must meet our inventory criteria in terms of desirability and market value. 2.
- Mike Byers Inc charges a 10% Commission on each sale. 3.
- The minimum time for any listing is thirty days.
- Seller agrees to a seven day return privilege from date of receipt.
- Seller agrees to use an escrow service if requested by the buyer.
- We reserve the right to deny or cancel any listing at any time.
- All listing are subject to prior sale.

Scanning Specifications

- Scan both the obverse and reverse of the entire holder.
- Scan with a resolution of at least 300 dpi.
- Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

- Name, Address & Phone Number
- E-Mail Address
- **Asking Price**

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

Publisher & Editor COINWEEK

CONWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the "Best Online News Site" for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... And we do it all for FREE.

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web
 to offer our subscribers the most comprehensive educational video available
 with information about rare coin and currency news, seminars, interviews,
 collecting tips and more.

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

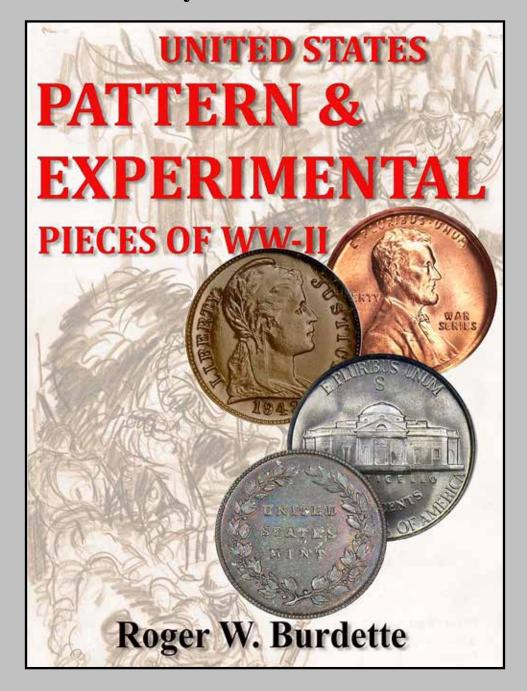

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

Numismatic Literary Guild 2013 Best US Coin Book!

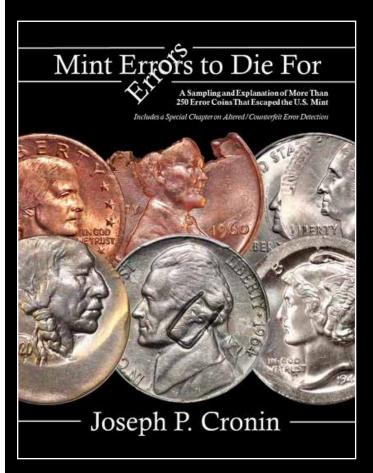

United States Pattern and Experimental Pieces of WW II uncovers the range and complexity of Mint experiments during this critical period in our history. Every documented experimental and pattern piece is described, illustrated where possible, and explained in detail. Author Roger W. Burdette untangles the mass of myth and assumption about these enigmatic pieces, and presents never before published research into the 'How' and 'Why' of their creation.

An Exciting New Mint Error Book:

Mint Errors to Die For

A Sampling and Explanation of More Than 250 Error Coins That Escaped the U.S. Mint

Some of the Features in Mint Errors to Die For Include:

- Coverage and definitions of numerous error types. Detailed explanations on the causes of various Mint errors

- Detailed explanations on the causes of various Mint errors.

 Dozens of high definition photos to help guide you on what to look for.

 Tools and resources needed to get started as a Mint error collector.

 Why it's important to learn and understand the minting process.

 Methods to help you detect counterfeit and altered coins made to resemble errors.

 How to assess if "damage" on Mint errors is considered desirable or undesirable.

 Suggestions on how to learn the value of your error coins.

 Interesting snippets of "Coin Trivia" and American History.

 Error collecting "Dos" and "Don'ts" that will help save you time, money, and pain.

Recommendations from Numismatic Experts

"One of the only new books on Mint Errors over the past 10 years, this is required reading for both the new and experienced collector. The information, background, and detailed photos are all there for anyone interested in studying the many mining mistakes made at our U.S. Mints."

— Fred Winberg, FCGS Mint error ambeniteator, author, and dealer.

"Mint Errors To Die For is a book that this coin specialty has needed for a long time. Joe Cronin is an educator by training and a passionate collector of errors and counterfeit coins. Both show through every clearly in this treellent tome. You will learn a lot and have fun while you do." — Steven Mills, original columnist for Error Trends Coin Magazine

a counterfeit researcher and writer for the past several years, the area of counterfeit errors is ond my personal scope and focus. However, now I have a 'Go-to' resource in this area. This k is a 'Must-lawe' to help identify many counterfeit and altered errors!"

— Jack Young, 2019 witner of the Anth-Counterfeiting Task Forc's 'Alian Kreuzer' 'Award.

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

New Edition of Bart's United States Paper Money Errors Available Now

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering SystemTM—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- · Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

uspatterns.com

The Society of U.S. Pattern Collectors is dedicated to the study of many of the rarest coins struck at the U.S. Mint: patterns, die trials and experimental pieces.

Welcome to The Society of U.S. Pattern Collectors!

For those of you not familiar with this fascinating area of numismatics, patterns are prototypes for coins that, for the most part, were never approved for circulation. Most patterns are very rare, some unique, and others unknown outside of museums.

A good place to start learning about these pieces is our Beginner's Corner which includes a page on How to use this Website or the Photo Gallery which contains examples of many of the different pattern issues.

The United States Mint produced more than 1000 different patterns, as well as many die trials and experimental pieces. Despite the great rarity of many of these individual items, the great variety makes the series surprisingly collectable.

There are relatively few collectors specializing in United States pattern coinage. Most of these collectors target specific areas. For example, there are collectors who specialize in Indian Cent patterns, others collecting Morgan dollar patterns, and so on.

In addition to these specialists, there are thousands of collectors of regular issue United States coins who try to buy a few patterns to complement their collections. Many of these historical coins have wide appeal and are surprisingly affordable. There are many collectors who, for example, would like to own an 1855 Flying Eagle large cent (J-167, about 500 pieces struck) to go with their collection of large cents or with their collection of Flying Eagle small cents.

Northeast Numismatics has a million dollar plus inventory of over

3,500 certified United States and world coins. We carry every area of U.S. coinage from colonials through rare gold including proof and mint state type, commemoratives, silver dollars and much more. We also offer an extensive inventory of world coins.

Northeast Numismatics, Inc. 100 Main Street, Ste. 330 Concord, MA 01742 800-449-2646 www.northeastcoin.com

High quality "fresh" coins are what we are known for and take pleasure in offering. We constantly are hearing from our customers about our excellent prices and high customer service. 2003 is our 39th year of business, so order with complete confidence. Also, please keep in mind that we are always buying coins of all kinds, certified and uncertified, to fill our want lists.

9 Martin's Error Coins 4

I have collected coins for more than 50 years and error coins for almost 35 years. I have collected not only Swedish coins but also coins from all over the world. My aim has been to find at least one such major error from all nations in the world. I also like to have as many type of errors represented in my collection. When I see a dramatic error coin I often think: how did it escape the mint? Most error coins are very unusual and should not come into circulation at all.

Great Britain 2 pence 1981, with double error. Off-cent strike and ragged edge clip, rare, Q: unc, nice toning.Price: 135 Euro

Guernsey, 1 penny struck on a half penny planchet, unusual! Q:xfprice: 95 Euro

World Error Coins for Sale Visit martinserrorcoins.com

Member of the Swedish Numismatic Society and CONECA

MINTERSORNEWS GLOSSARY

What Are Off-Metal Errors?

Off-metal errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

As amazing as it sounds, this is a 1913 Buffalo Nickel struck on a U.S. \$5 Gold planchet. This unique discovery surfaced in 2019 and was previously unknown to the numismatic community.
