MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our 15th year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,200 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Over the last 20 years with the advent of the internet millions of collectors have flocked to online auctions and dealer websites. Many people connect to various online forums and clubs to share knowledge and learn about Mint Errors. Everyone, including dealers, collectors and even investors have instant access to information as never before. The Mint Error market has experienced an explosion in collector interest over the last 20 years.

Time and again, rare and unique Mint Errors in the numismatic market have made headline news. Authentication and certification of Mint Errors is now commonplace. In 1991, ANACS was the first to authenticate, grade and encapsulate major Mint Errors. In 1999, PCGS and NGC began certifying Mint Errors. Major Mint Errors are now pursued, collected and traded just like patterns, territorial Gold, colonials and other interesting segments of numismatics.

In 1975, I purchased a 1900 Indian Head Cent struck on a \$2 1/2 Indian Gold blank planchet for \$7,750 at a major coin auction. That price ranked among the top five ever realized for a Mint Error that few dealers or serious collectors would even consider. At that time price guides for Mint Errors were nonexistent and today that Indian Head Cent struck in Gold is certified MS65 by PCGS and is valued at six figures.

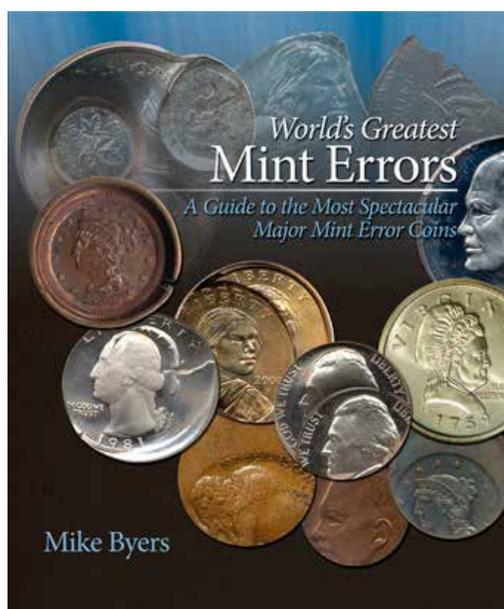

MINT *ERROR* NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers (mikebyers.com) is president of Mike Byers Inc. He has been a professional numismatist for over thirty-five years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Owner, Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.

Fred Weinberg is a highly respected numismatist, with 40 years of full time experience in the rare coin marketplace. He deals in numismatic United States Gold & Silver coinage, as well as specializing in buying & selling Major Mint Error coinage of all types. He is one of the original 31 dealers selected as an authorized PCGS (Professional Coin Grading Service) dealer at its inception in 1986.

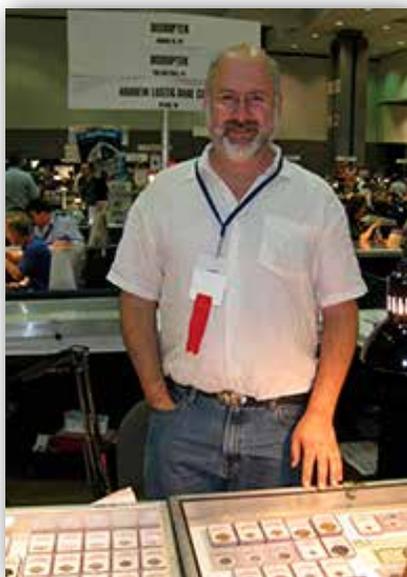

Marc One Numismatics, Inc.

Marc Crane is a dealer specializing in rare U.S. coins and U.S. patterns. He started Marc One Numismatics, Inc. in 1991.

Marc tied for 1st place in a PCGS grading contest and is a contributor to the Red Book. He also assisted in the pattern section for the Red Book. He regularly attends coin shows and auctions across the country.

MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Andy Lustig has been dealing in U.S. and World Coins since 1975 and has attended more than 2,000 coin shows and auctions. Andy is the co-founder of the Society of U.S. Pattern Collectors (uspatterns.com). He has been a member of the Professional Numismatists Guild (PNG #614) since 2005. He is a member of NGC and was also a former grader and authenticator for PCGS.

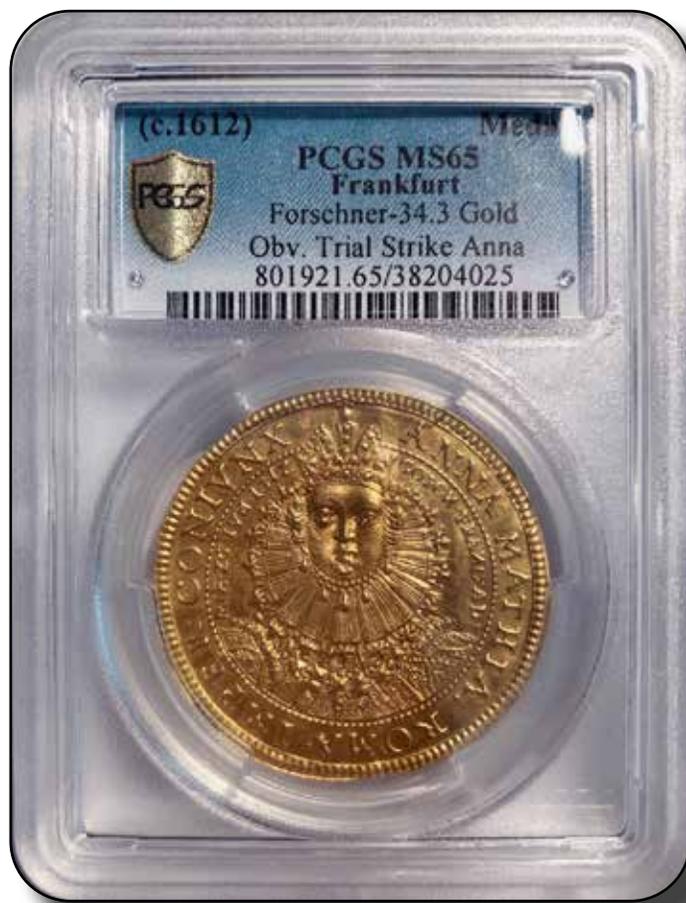

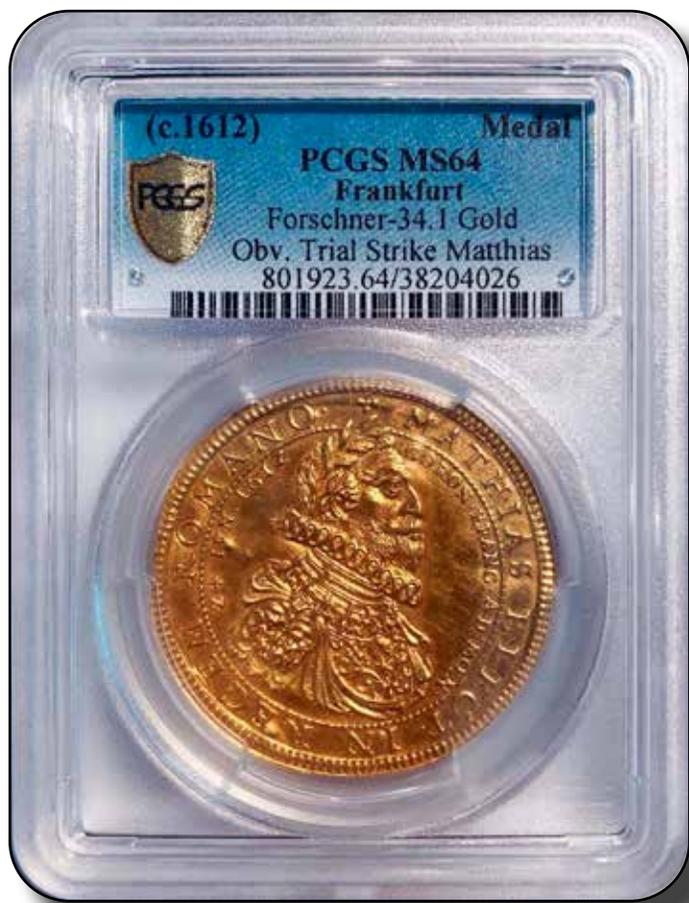

Jeff Ylitalo has collected Mint Error coins since 1993. He has avidly researched & written about this area of numismatics since 2006 contributing dozens of articles to CONECAs bi-monthly publication "ErrorScope" and Mike Byers "Mint Error News". Jeff is the former editor for the "ErrorScope" 2008-2017. Jeff's research and collecting focus is now primarily centered on World Error coins. Jeff can be reached via e-mail at: jylitalo@yahoo.com

PCGS CERTIFIES GERMAN GOLD OBVERSE DIE TRIAL STRIKES c.1612 MATTHIAS CORONATION MEDALS

by Mike Byers

*Matthias II and Anna
German States - Frankfurt am Main
Plate Coins in Forschner - #34.1 Gold & #34.3 Gold*

PCGS CERTIFIES GERMAN GOLD OBVERSE DIE TRIAL STRIKES

This historical and museum quality set of gold Coronation Die Trial Strikes was just authenticated and certified by PCGS and is one of only two known. It is amazing that after 500 years, these gold Die Trials remained together, intact and preserved in gem mint state condition. They are 5 or 10 Ducat size in diameter.

The Matthias II Obverse Trial Strike is the plate coin in Forschner, listed as #34.1 gold, with a diameter of 37 mm. The other Die Trial of his wife Anna, is also the plate coin in Forschner, listed as #34.3 gold, with a diameter of 36 mm. The Forschner numismatic reference book on medals is referenced by both PCGS and NGC for attribution and listing the Forschner # on the inserts.

Matthias II of Austria (Feb 24, 1557-March 20, 1619) was crowned King of Hungary and Croatia in 1608. He was also King of Bohemia in 1611, as well as the Archduke of Austria. He was Head of the House of Hasburg.

Matthias II reigned from June 13, 1612 to March 20, 1619 as the Holy Roman Emperor. These gold obverse die trials commemorate his Coronation, and likely were presented to Matthias for his approval prior to striking the Coronation medals. It's unbelievable that after centuries of war, barbaric times and world instability, these even exist today!

The Electors, located in Frankfurt am Main, Germany but part of the Roman Empire at that time, authorized and minted coins and medals to celebrate Coronations and the accession to the position of Holy Roman Emperor. Frankfurt am Main was a free City and only accountable to the Holy Roman Emperor. The Monarch who would receive the Coronation at the hands of the Pope was elected by the Electors.

Electors were members of the Electoral College that elected Matthias II as the Holy Roman Emperor in 1612. The Mint struck these 2 gold Die Trials of the obverse

PCGS CERTIFIES GERMAN GOLD OBVERSE DIE TRIAL STRIKES

portraits of Matthias and Anne, and eventually struck the actual gold medals which are extremely rare, usually seen in circulated and/or damaged condition.

In 1618, during the last year of Matthias reign as the Holy Roman Emperor, the Thirty Years War broke out in Europe, lasting until 1648. It was one of the most destructive wars in history, starting as a war between Protestants and Catholics but evolved into a major European full-scale war resulting in millions of deaths and transforming Europe. The Holy Roman Empire eventually became what is known as Austria and Hungary today.

Gold coins and gold medals of Matthias II and of Matthias as the Holy Roman Emperor are extremely rare, and are seldom seen. Many are often damaged, especially in the larger denominations of the 4 Ducat, 5 Ducat and 10 Ducat, and on the Gold Coronation Medals.

In Freidberg, under Germany Frankfurt am Main, gold coins from 1612-1618 during the short reign of Matthias II (Freidberg #947-957) are designated as very rare and unpriced.

In The Standard Catalog of World Coins (Krause) the ND 1612 Matthias 3 Ducat (KM #43) is listed as rare and unpriced. The 5 Ducat (KM #44) is also listed as rare and unpriced.

Heritage Auctions only shows (1) Matthias large size gold coin, a 4 Ducat Medal, Forschner #21 that sold for \$18,800. It was also a 1612 Commemorative gold coin celebrating his Coronation and rise to Holy Roman Emperor. It was certified UNC by NGC, but was damaged mount removed.

Stacks Bowers sold a Matthias Gold Medal "Seize and Captured Graw" from Hungary in 1605 for \$19,550. It was 49.5 MM and was in VF condition, uncertified, with damaged heated edges.

PCGS CERTIFIES GERMAN GOLD OBVERSE DIE TRIAL STRIKES

Stacks Bowers also sold a German State Frankfurt am Main 5 Ducat ND 1612 commemorating the election of Matthias as the Holy Roman Emperor. It was 32.2 MM, 2 known, realizing \$60,000. in VF condition, with damage, graffiti in the obverse fields.

In another Stacks Bowers auction, they sold an Austria Vienna 10 Ducat, 32.8 MM, of Matthias 1612 in EF condition, uncertified, realizing \$23,000 with damage, 2 carved X's in the obverse fields.

As documented above, most of the large Ducat gold coins and gold Coronation Medals of Matthias, whether as his Coronation as King or his accession to the throne as the Holy Roman Emperor, are very circulated and damaged, selling in the 20k to 60k USD in public auctions.

Recently in a Kunker German Coin Auction, a non damaged 10 Ducat

1619 of Matthias II from Vienna, Austria in good - very fine condition, not certified by PCGS or NGC, sold for approximately \$164,650.

Very few gold medals of Coronations of European Kings, have the fascination and excitement of these 2 gold Obverse Die Trials. Additionally, in this case they also celebrate Matthias' rise to be the Holy Roman Emperor. They are historically significant and numismatically important since they document a Coronation and accession to the position of Holy Roman Emperor.

These PCGS certified Matthias Gold Obverse Die Trial strikes defy logic and history, both surviving 500 years in gem condition. They belong in the finest European collection of gold coins, in a world-class collection of numismatic treasures, or in major Museum showcasing their history and significance.

MINT ERRORS FEATURED IN SPECIAL MONTH-LONG ONLINE HERITAGE AUCTION

Heritage is putting together a fascinating assortment of error coins for the inaugural Monthly Error Coin Auction, Sale #60156.

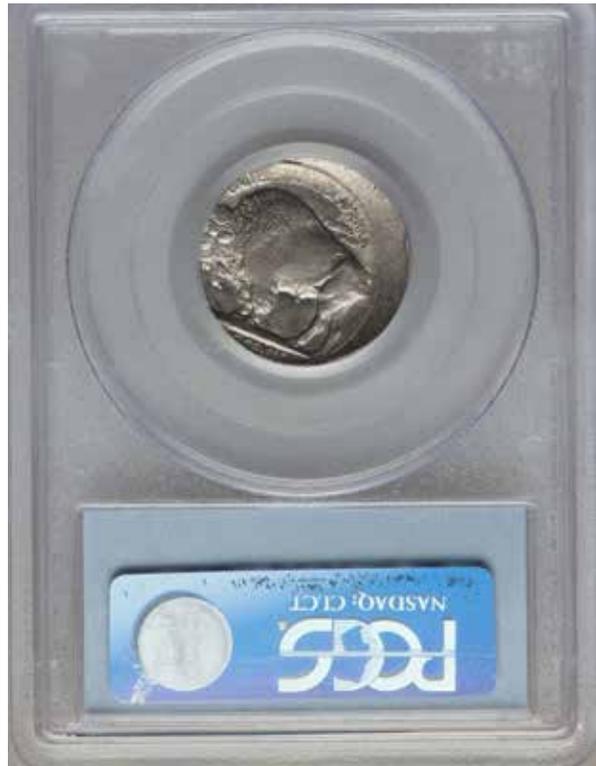

Heritage just took in two additional consignments that will contribute off-metal strikings, brockages, off-center coins, and much more to this sale. As coins continue to be added, you can see the variety of strange and surprising mistakes made by the US Mint. From a dime made on a blank meant for a penny to crazy-looking die caps and brockages, error coins are pieces that would stand out even to a non-collector.

U.S. & WORLD MAJOR MINT ERRORS

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be from the United States, certified by PCGS or NGC, have a minimum value of \$25,000 each and should be either Gold Coins (Pre-World War 1), Patterns or Early Type Mint Errors (Pre-1950).
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

PMG GRADES MISMATCHED SERIAL NUMBER ERROR ON US \$20 BILL

BY NGC

*A 2020 FUN Show attendee discovered
the note in her change at the show.*

\$20 2013 Federal Reserve Note Boston

Fr#2097-A (MAB Block) Rios | Lew

S/N MA54550151/54545151B pp A **Mismatched S/N Error**

30
Very Fine

PMG GRADES MISMATCHED SERIAL NUMBER ERROR ON US \$20 BILL

A woman who made a purchase at the January 2020 Florida United Numismatists (FUN) Show in Orlando got an unexpected bonus in her change: a \$20 bill with a valuable error. She immediately submitted the note to Paper Money Guaranty® (PMG®), which confirmed that the 2013 \$20 Federal Reserve Note (Boston) had an authentic — and quite rare — mismatched serial number error.

A PMG-certified modern US note with this error is likely worth hundreds of dollars or more, resulting in a tidy profit for the woman who discovered it in her change.

For instance, another 2013 \$20 Federal Reserve Note — a Richmond example graded PMG 66 Gem Uncirculated EPQ — with a mismatched serial number error sold for \$1,140 at a Heritage Auctions sale at the January 2020 FUN Show. Meanwhile, in the same sale, a 1977A \$5 Federal Reserve Note (St. Louis) with the same error graded PMG 40 Extremely Fine EPQ realized \$750.

“It was such a thrill to find a rare banknote in change right at the FUN Show,” said Tammy Demars, a Texas resident who helps manage a Facebook group called Coins & Currency Live Auctions. “After I realized I had a

PMG GRADES MISMATCHED SERIAL NUMBER ERROR ON US \$20 BILL

potentially valuable note, I brought it directly to the PMG booth for confirmation.”

Paper money collectors place a premium on these notes because quality control measures at the US Bureau of Engraving and Printing usually keep such errors from ever reaching circulation. Banknotes’ serial numbers are vital in helping to ensure the integrity of paper money.

The serial numbers on the note (MA54550151B and MA54545151B) differ in their middle two digits: 45 vs. 50. The serial numbers printed on a note are imparted by a pair of numbering wheels. When the serial numbers don’t match, it indicates something

went wrong — such as one of the numbering wheels was temporarily stuck.

“This note is an excellent reminder that great numismatic discoveries can still be made simply by looking at our pocket change,” said Mark Salzberg, Chairman of PMG. “The condition of this note suggests that quite a few people unwittingly let a valuable rarity slip through their fingers.”

Collectors and dealers who have error notes can submit them to PMG for certification under the Economy Special grading tier or higher with the error noted under the Variety/Pedigree column.

PCGS CoinFacts

Your Online Reference for U.S. Coins

Welcome to PCGS CoinFacts. Our site includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

Unique 1969-S Proof Dime Mated Pair

by Mike Byers

Unique 1969-S Proof Dime Mated Pair

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

This unique pair of PROOF 1969-S Roosevelt Dimes were struck together and mate perfectly. The first coin was double-struck off-center

and fits perfectly into the second coin, which is an incuse-brockage. It's amazing that both survived the minting process and were kept intact and in gem proof condition. As mentioned above, this proof mated pair was originally discovered in a group of San Francisco proof mint errors that was auctioned by the State of California. This unique mated pair was certified by NGC and Coin #2 is in a holder with double-thickness since it was double struck at such a severe angle.

This is one of the most dramatic, fascinating and intriguing proof errors ever discovered. Certainly this unique mated pair of proof Roosevelt Dimes ranks at the top of all mint errors known. The size, eye appeal, and visual effect of being struck together is amazing. In addition, the status and prestige of being struck in proof makes this pair one of my favorite mint errors in 40 years of handling numismatic rarities.

NGC CERTIFIES PATTERN COINS FROM THE ESTATE OF US MINT CHIEF ENGRAVER CHARLES E. BARBER

BY NGC

*The patterns were struck in the late 1800's
as proposed coin designs and compositions.*

NGC CERTIFIES PATTERN COINS FROM THE ESTATE OF US MINT CHIEF ENGRAVER CHARLES E. BARBER

Numismatic Guaranty Corporation® (NGC®) has certified five 19th century US pattern coins that belonged to Charles E. Barber, the US Mint Chief Engraver from 1880 to 1917. A pattern coin is one that features a proposed design, composition or denomination.

Three of the patterns were designed and sculpted by Barber, while the other two were executed by his father, William, who preceded him in the role of Chief Engraver, serving from 1869 to 1879. The five pattern coins were submitted to NGC on behalf of their descendants.

William Barber served as 5th Chief Engraver of the US Mint from 1869 to 1879, and his legacy includes the US Trade Dollar, struck only for a short time to compete with other nations' silver coinage in Asia. He also produced many patterns.

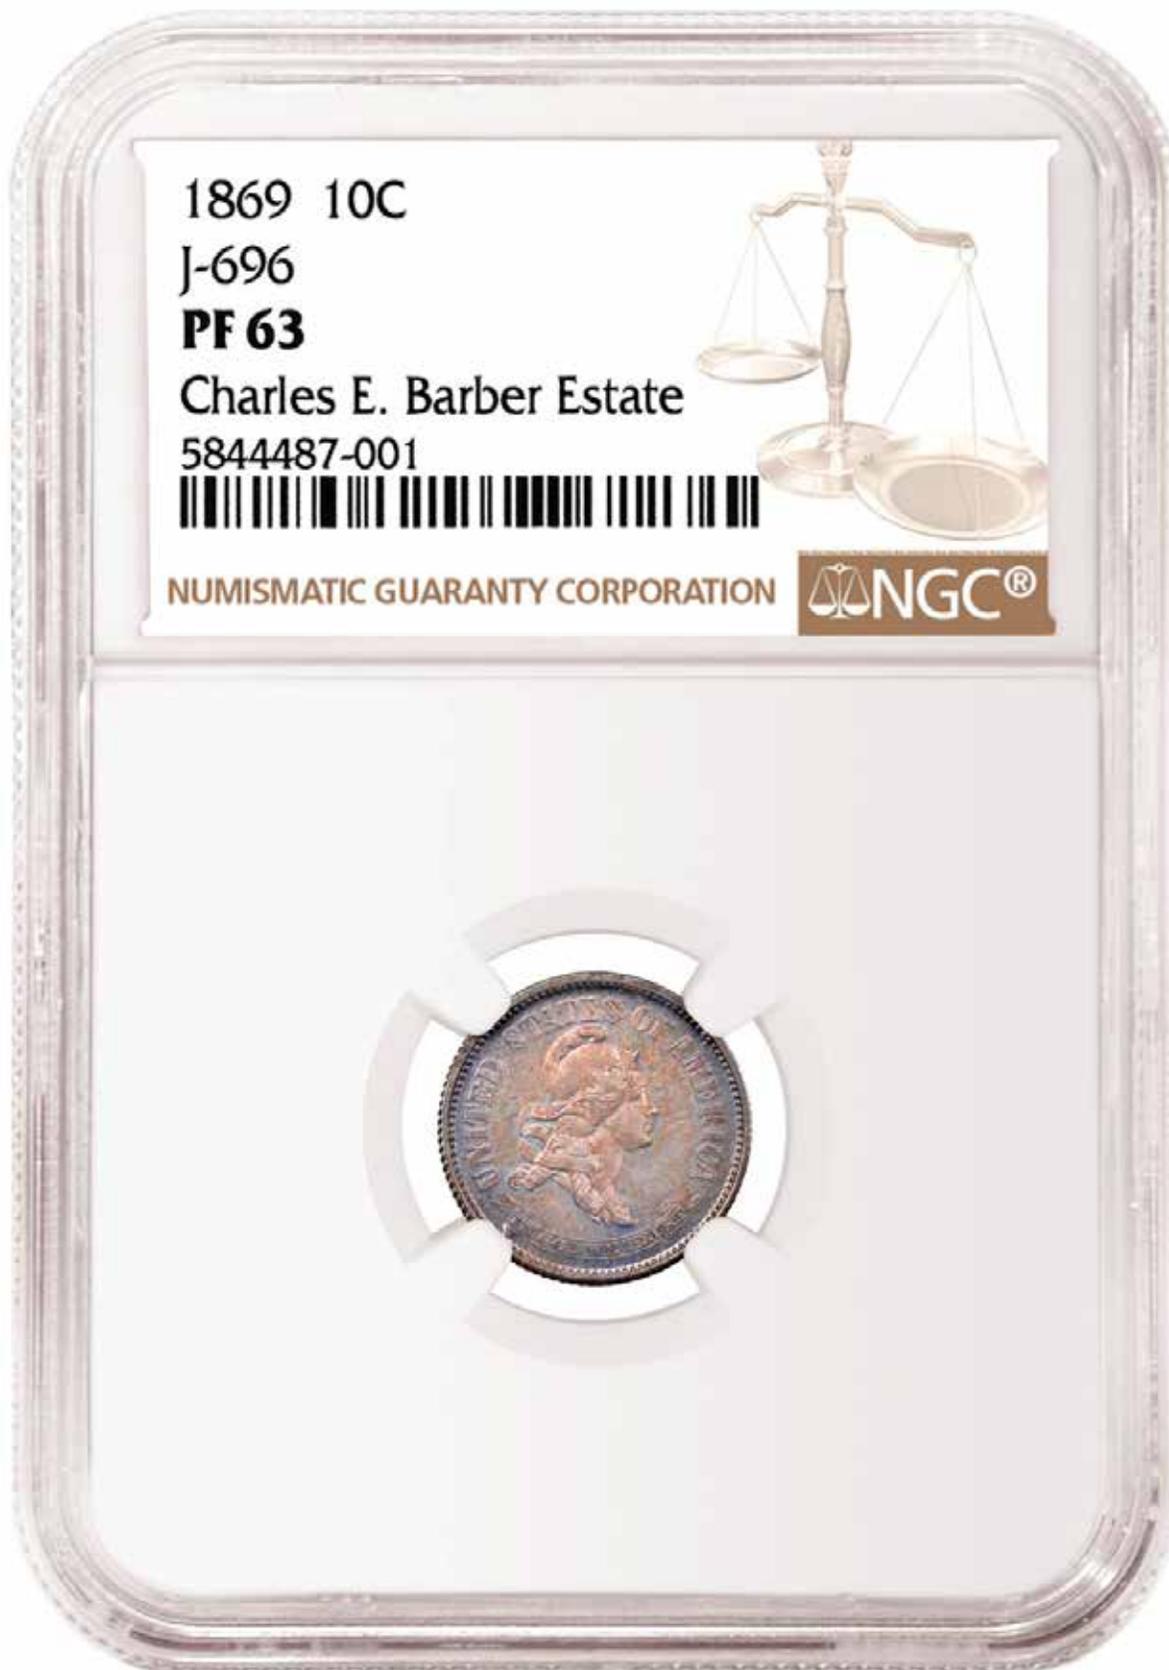

The first of the Barber Estate coins is an example of Judd-696 (attributed according to J. Hewitt Judd's United

States Pattern Coins). This 1869 Pattern Dime is struck in silver and is just faintly larger in diameter than half dimes of the period. Rated R-5 (31-75 known), it was graded NGC PF 63.

Judd-696 is an example of the Standard Silver series of patterns created in 1869-70. These were proposals for a silver coinage of reduced size and weight at a time when silver issues were trading at a premium to the greenbacks and fractional notes that dominated commerce. Ultimately, this plan was rejected, but it left a rich legacy of experimental strikes in various die marriages and compositions.

A second example of William Barber's Standard Silver work is featured in the Barber Estate submission. This is an 1870 Pattern Dime, attributed as J-843, that is similar in its design elements but features an alternative version of the Liberty bust and wreath. Also struck in silver, J-843 is rated R-6 (13-30 known). It has been certified as NGC PF 64.

NGC CERTIFIES PATTERN COINS FROM THE ESTATE OF US MINT CHIEF ENGRAVER CHARLES E. BARBER

William Barber and his wife immigrated to the US from England in 1852, when son Charles was just 12 years old. Following William's death, Charles was appointed his father's successor as Chief Engraver. One of the most prolific coin engravers in US Mint history, Charles Barber lends his name to three series that began in 1892: a dime, quarter and half dollar.

Charles Barber also created a broad range of pattern coins, including a unique series of "holey" one-cent and five-cent pieces in 1884. Conceived by artist Eastman Johnson — perhaps as an aid to the blind — these coins with center perforations were never approved for mass production, and only rare patterns survive from this experiment.

The Barber Estate submission includes two examples of Judd-1721 cents struck in nickel (rated R-5). These display a very simple design comprised of a wreath, a tiny shield and quite spare text. They are graded NGC PF 64 and NGC PF 65.

The final coin is an example of Judd-1767, an 1896-dated five-cent piece coined in nickel. It features an obverse

displaying a shield somewhat similar to that on the reverse of current cents. This is paired to a reverse showing the national legend around a wreath that encloses the denomination.

The U.S. Mint was not contemplating a change to the cent, and the dies were simply a test of alternative metallic compositions, including pure nickel. Certified as NGC PF 66, the most recent edition of the Judd pattern book reports seven known, making this newly revealed example the eighth.

"Numismatics is a dynamic field, and you never have to wait long for another exciting discovery," said NGC Chairman Mark Salzberg. "NGC is honored to have certified these historic pieces from a family that had such a lasting impact on the coin collecting world."

The coins' NGC certification labels include the important pedigree of Charles E. Barber Estate. They were submitted to NGC by John Frost, a numismatic author and president of the Barber Coin Collectors' Society, on behalf of great-grandsons of Charles Barber.

The Northern Nevada Dollar Error Gallery

by Allen Rowe

We enjoy collecting dollar errors because with as many dollars as we buy and sell day in and day out errors in this series are still rarely seen. Most of these types of errors would have never left the mint building because at that time coins were just money and nobody wanted a piece of money they couldn't spend. Besides that, the coiner could be fired for shoddy work. Quality control should have thrown them back into the melting pot had they been caught. On larger coins, such as these, errors were most often caught and destroyed at the mint being as they were easier to spot than a smaller size. These errors are not for sale, they are here for your viewing enjoyment.

The Northern Nevada Dollar Error Gallery

1882-CC 10% Off Center Morgan Dollar

The first coin on this tour is an Uncirculated 1882-CC Dollar that was struck 10% off center. What this means is that the planchet being fed into the press had not come to rest on the dies before it was struck. Like the Broken CC, this coin has two of the same attributes that make us excited. It is from our home town of Carson City and it is a Morgan dollar error. We do love CC errors!

The Northern Nevada Dollar Error Gallery

1891-CC 10% Off Center Morgan Dollar

Our newest acquisition is an 1891-CC Dollar struck 10% off-center. This piece is a similar error to the 1882-CC, but with some exciting twists. This is now our second favorite error, only because the Broken CC Dollar simply cannot be topped. However, this piece is not only a rare date CC Dollar, but also extremely nice for the grade. We do love CC errors!

The Northern Nevada Dollar Error Gallery

1884-CC Struck Through Grease Morgan Dollar

Another new acquisition we have just added is an 1884-CC Dollar graded MS-61 that was struck through grease giving it a very interesting flat look.

The Northern Nevada Dollar Error Gallery

1878-CC Rotated Reverse Morgan Dollar

What's so special about this coin? This Carson City Dollar error has a rotated reverse. If you hold a U.S. coin in your hand and turn it top over bottom (not side to side) the reverse should appear right side up. With this coin, the reverse was struck with a rotated die!

The Northern Nevada Dollar Error Gallery

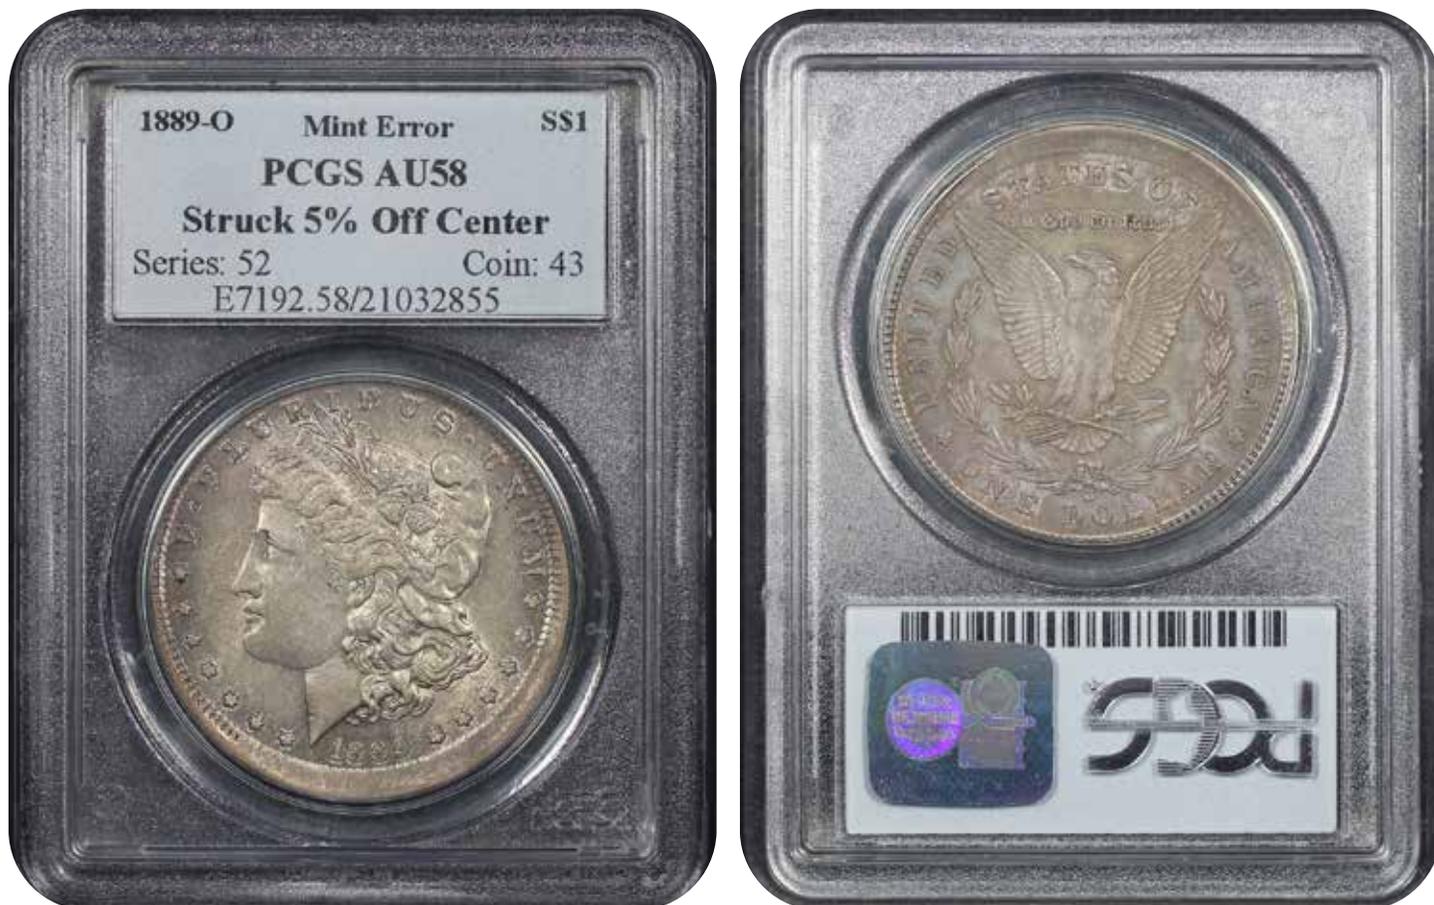

1880-S 15% Off Center Morgan Dollar

This coin is Uncirculated 1880-S Dollar that was struck 15% off center. Although this error is not a Carson City error, it is a Morgan dollar with a dramatic striking error. An off center is created by the coin being struck when the planchet is not in perfect alignment with the dies. Under normal circumstances the collar would have held the planchet in place for the dies to strike.

The Northern Nevada Dollar Error Gallery

1889-O 5% Off Center Morgan Dollar

Another one of our off center Morgan Dollars. This coin is an Almost Uncirculated 1889-O Dollar that was struck 5% off center. Although this error is not as dramatic as the 82-CC, it is still a pretty interesting coin.

The Northern Nevada Dollar Error Gallery

1902-S 5% Off Center Morgan Dollar

This coin is interesting because, like our CC errors, this is a better date coin and an error. Struck 5% off center like our 1889-O.

The Northern Nevada Dollar Error Gallery

1921 Broadstruck out of Collar Morgan Dollar

Here is a 1921 Morgan Dollar Broadstruck out of the collar graded MS-64 by PCGS. Even though this error is not quite as dramatic as the previous errors, it is a dollar error. We debated on whether or not to buy this one when it was offered to us, but in the end we did just because dollar errors are so rare.

The Northern Nevada Dollar Error Gallery

1922-S Large Broadstruck out of Collar Peace Dollar

Here is a 1922-S Peace Dollar Broadstruck out of the collar graded AU-55 by PCGS. Wow, at first glance this error does not look as dramatic, but as you look you get a feel for how dramatic it really is. The coin looks much larger than a regular issue dollar due to the fact that much of the metal was pushed outward during the striking process, due to the collar not coming up to meet the coin. And also, Peace dollars are much rarer due to a shorter production run, improved technology, and better quality control. Too bad the Carson City Mint wasn't around to strike these beauties.

The Northern Nevada Dollar Error Gallery

Silver Dollar Blank Planchet

Here is a Type 2 silver dollar planchet graded AU58 by PCGS. When planchets were made for silver dollars there were two steps to the process. First, the planchet was cut from the strips of metal, what a type 1 planchet would be. Second, the edges of the blank planchet were rolled. This rounded the sides in preparation for the denticles and edge of the coin to be struck up. Our planchet made it through the cutting and rolling processes, but never to striking. One can always wonder what year this planchet was made. Was it intended for a Morgan dollar? A Peace dollar? Or, could this one have even been made earlier and intended for a Seated dollar? We will never know, but it does add some intrigue to the piece.

NGC-CERTIFIED 1831 GREAT BRITAIN COIN REALIZES \$425,000 AT CNG NYINC AUCTION

BY NGC

*The gold rarity sold for more
than twice its pre-sale estimate.*

NGC-CERTIFIED 1831 REALIZES \$425,000 AT

GREAT BRITAIN COIN CNG NYINC AUCTION

A gold 19th Century coin from Great Britain certified by Numismatic Guaranty Corporation® (NGC®) realized \$425,000, more than double its pre-sale estimate, at an auction presented January 14-15 by Classical Numismatic Group (CNG).

The stunning Great Britain 1831 Gold Crown graded NGC PF 62+ Ultra Cameo had a pre-sale estimate of \$200,000. It shows William IV on the obverse and a coat of arms under a crown and mantle on the reverse.

Other particularly significant NGC-certified coins sold at the CNG auction held as part of the New York International Numismatic Convention (NYINC) include:

- A Roman Empire (Hadrian) AD 117-138 Gold Aureus graded NGC Ancients MS, Strike 5/5 and Surface 4/5, with Fine Style that realized 77,500.
- A Great Britain 1826 5 Sovereign graded NGC PF 62 Cameo that realized \$65,000.

- A 14-coin Great Britain 1830-1837 Coronation Issue Proof Set that realized \$60,000. Among the set's NGC-certified coins are a sixpence graded NGC PF 65, a half sovereign graded NGC PF 64 Ultra Cameo, a shilling graded PF 64 Cameo and a halfpenny and Maundy penny graded NGC PF 64 BN.
- A Lydia (Croesus) 561-546 BC Gold Stater graded NGC Ancients Ch MS, Strike 5/5 and Surface 5/5 that realized \$42,500.
- Another Lydia (Croesus) 561-546 BC Gold Stater graded NGC Ancients Ch MS, Strike 5/5 and Surface 5/5 that also realized \$42,500.
- An England 1681 Gold 5 Guineas graded NGC AU 55 that realized \$37,500.
- A Great Britain 1875 Silver Pattern Half Crown graded NGC PF 64 that realized \$30,000.

All prices realized are stated in US Dollars and include a buyer's fee of 20%.

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

LEARN GRADING: WHAT IS A MINT ERROR?

BY NGC

This installment in the series covers mint errors that can occur when something goes wrong with a coin's planchet.

Every year, mints for major countries produce billions of coins. Despite sophisticated technology and comprehensive quality control efforts, some mistakes are made. Coins with mistakes are called “mint errors” and are among the most popular segments of numismatics.

Coins are created when a pair of dies strike a planchet, imparting the design. But sometimes a wrong or faulty planchet is used. Here are some examples:

Wrong planchet: This error occurs when a correctly made planchet from one denomination is accidentally fed into a press striking another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin.

LEARN GRADING: WHAT IS A MINT ERROR?

A coin struck on the wrong planchet.

LEARN GRADING: WHAT IS A MINT ERROR?

Transitional error: This occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous is the 1943 Lincoln Cent struck on a 1942 copper blank. Other famous examples include 1965 US coinage struck in silver instead of clad. There are also

transitional errors struck on blanks intended for the next year. An example is 1964 coinage in clad instead of silver. More recently, transitional errors were discovered involving the Susan B. Anthony and Sacagawea Dollars of 1999 and 2000.

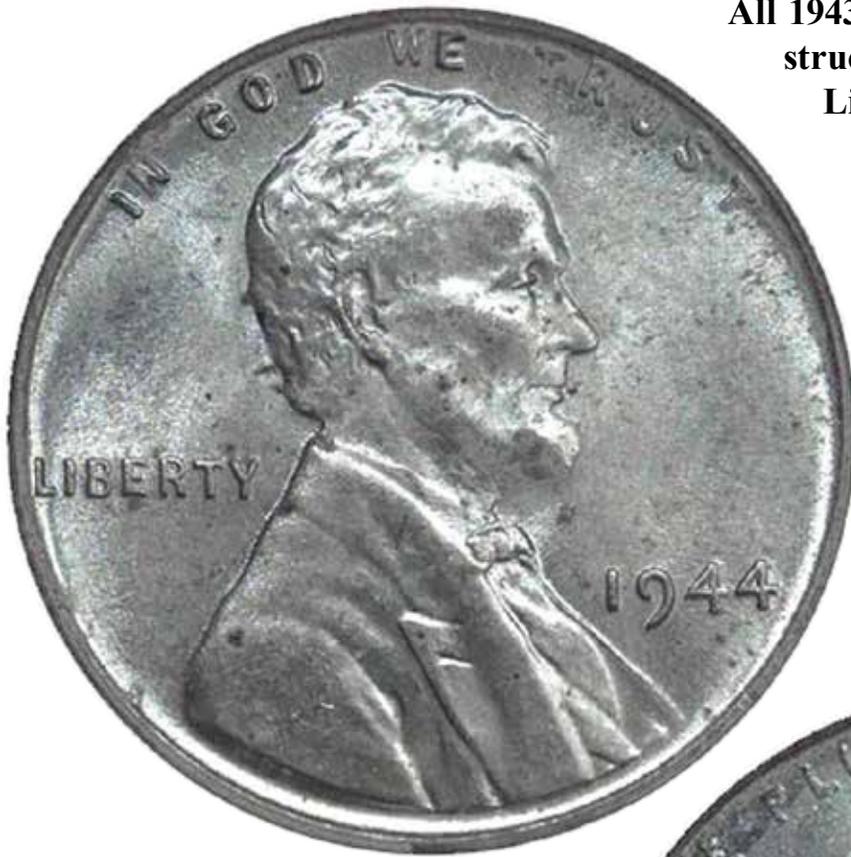

All 1943 Lincoln Cents were supposed to be struck on steel planchets, and all 1944 Lincoln Cents were supposed to have returned to the traditional copper planchets. Here are examples of transitional errors with the wrong-metal planchets.

LEARN GRADING: WHAT IS A MINT ERROR?

All 1943 Lincoln Cents were supposed to be struck on steel planchets, and all 1944 Lincoln Cents were supposed to have returned to the traditional copper planchets. Here are examples of transitional errors with the wrong-metal planchets.

LEARN GRADING: WHAT IS A MINT ERROR?

Clipped planchet: Planchets are punched from large sheets of metal. After blanks are cut from a sheet, it is moved forward before more blanks are punched out. If the sheet fails to be fed far enough ahead, the punch will overlap an already punched area, causing that planchet to have a circular

“clip” of missing metal. A good way to tell if the coin is an error or simply damage that occurred outside of the mint is to look for signs of metal flow into the blank area, which indicates a genuine clip. The types include curved, straight and ragged edge.

A coin with a clipped planchet.

LEARN GRADING: WHAT IS A MINT ERROR?

Struck fragment: The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally,

a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or struck on both sides.

An example of a struck fragment.

LEARN GRADING: WHAT IS A MINT ERROR?

Lamination: Dirt and impurities in the metal of the planchet can manifest themselves as cracks and peels on the struck coin. A planchet can split if impurities are severe enough.

A coin with a cracked planchet.

LEARN GRADING: WHAT IS A MINT ERROR?

Missing clad layer: This error happens either when a clad layer was missing before the strike or when the layer was loose and separated from the rest of the coin after the strike. The side of the coin with the clad layer missing will be copper-colored, showing the exposed core of the coin.

**1970-D Quarter graded NGC Mint Error
MS 64 - Missing Clad Layer on Reverse.**

LEARN GRADING: WHAT IS A MINT ERROR?

Misplaced or missing center hole: Some country's coins feature holes at the center of their planchets. Occasionally, these holes will be misplaced or missing altogether.

1995M Spain Castilla & Leon 25 Pesetas,
Off-Set Center Hole, NGC MS65

LEARN GRADING: WHAT IS A MINT ERROR?

Missing edge lettering: This mint error has been discovered in the US Presidential Dollar series. Some of these coins inadvertently left the United States Mint without edge-lettering on them. The inscriptions “In God We Trust,” “E Pluribus Unum,” as well as the mintmark and year are absent from these coins.

COINWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

OFF-CENTER LINCOLN CENT WITH RETAINED WIRE BRISTLE

by Christopher Talbot Frank, CTF Error Coins

When I first saw this coin, the opening photograph in the auction showed a very overpriced off center cent. I overlooked the auction many times, writing it off as not being realistic.

I then saw that the same seller had some very special major mint error coins for sale. I looked at the auction again to view all the images and saw why this coin is so special.

OFF-CENTER LINCOLN CENT WITH RETAINED WIRE BRISTLE

The reverse of this 1998 off center cent has a struck in and retained wire bristle. Half the wire bristle is struck into this coin. The other half was left unstuck and slightly bent upwards away from the

planchet, leaving a noticeable space in between the two. The wire bristle measures 3 mm x 9 mm. PCGS graded this coin as a 1998 MS62 Struck in Retained Wire Bristle on an Off Center Cent Mint Error.

FUN SHOW REPORT

JANUARY, 2020

by Jon Sullivan

We just got back from a very busy FUN show sunny and warm Orlando, Florida: and it was our best show in probably over a year! The show was busy with both buyers and sellers, and we were surprised how much of both there was at the show. Some local collectors came in, as well as buyers from other parts of the country who flew or drove in to attend this one of the biggest coin shows of the year. It was good to see long time customers and also fellow dealers at the show.

Although there has been softness in the coin market as a whole for the last several years or so, it was a good show for everyone we talked to. No one said they were having a “bad show”, although a few dealers said it was “only ok”, most said it was a very good show with lots of

sales. We’d estimate that we sold more at the show than the last several shows combined!

The buying was good as well, and we acquired several double row boxes of slabbed or raw coins, and small groups of other coins. These will be coming out in the coming weeks and months, as they are processed, attributed, priced, and then there are always coins that get sent off for certification (which certification can sometimes can take months to get the coins back.)

Some of the more interesting coins we acquired included an extremely rare 1986 G\$25 Eagle with strong clashed dies on its reverse (one of just a few known for gold eagle coinage), double edge lettering 2019 native American

FUN SHOW REPORT JANUARY, 2020

dollar (unique—which we learned later after we bought it), as well as various off-metals, a large number of double-struck/broccage cents, a large number of double edge lettering coins (of the more common sort), as well as many stand alone coins from numerous sellers. One customer brought up an old book of relatively minor mint errors that had probably been housed in the album since the 1960's or so, and were unfortunately covered in PVC—this type of damage is where “conservation” is invaluable, and also is why collectors should throw out any PVC flips they have. Long term it damages the coins as the PVC leaches onto the coins (but I digress.) These and other coins will be offered first to our customer with want lists (if you haven't sent yours to us, please do), and then through our website (if you haven't signed up for our email inventory alert, it might be a good idea since many coins sell quickly.)

It is more and more the case that coins are “online”, and both collectors and dealers primarily do business this way—it's convenient, easy, and the “inventory” which can be viewed is endless. Most dealers do sell nowadays mostly on their websites, frequently on other online sites, and do mostly wholesale at coin shows. However, because of the vast amounts of business done at shows (particularly wholesale) coin shows will not be going anywhere anytime soon. They're too important to the hobby, and while some shows will and have disappeared, the shows in good locations, at the right time of year, and properly promoted will always be around since they serve an invaluable wholesale (and to a small degree retail) function. Very well run and attended shows like the FUN show reaffirm our belief in that.

Lincoln Cent Cancelled in India?

One of our readers found this interesting Lincoln Cent that has been cancelled with a unique pattern similar to another cancelled Lincoln Cent that was struck on a 1942 India 1/4 Rupee.

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

DUAL COUNTRY DOUBLE DENOMINATION PANAMA 1c DOUBLE STRUCK ON U.S. LINCOLN CENT

by Jeff Ylitalo

This major mint error is a lustrous 1982 Panama 1 Centesimo Double Struck on a previously struck United States 1982 Lincoln Cent. The coin rotated 90 degrees CCW after the first strike with a beautiful second strike that is 30% off-center.

The Panamanian obverse die/design struck the Lincoln cent reverse. Underlying design letters of the Lincoln cent UNITED STATES OF AMERICA and E PLURBIS UNUM are clearly seen. Remnants of the Lincoln Memorial building are easily distinguishable. The Panamanian reverse die/design featuring

the bust of Chief Urraca struck the Lincoln cent obverse. Underlying design letters LIBERTY and ST of TRUST are clearly seen. Numerals 82 of the date, 1982, are present.

I have seen a number of spectacular struck over U.S. coins, but this is the first I've encountered having been double struck by foreign dies!

This amazing and unique error was acquired from the estate of the late Louis Hudson, a well known numismatist specializing in Latin American coinage.

BUYING MAJOR ERROR COINS & CURRENCY

If you have a single major mint error coin, either a recent issue or an older type coin, or 1,000 Off-Center Cents, please contact us. We stock over 60,000 Major Mint Error Coins and constantly need to purchase Major Error Coins for our clientele (please note that we do not deal in or buy Die Varieties, Damaged Coins, Doubled Dies, Filled Dies, or Die Cracks).

We do buy Major Mint Errors - such as Off-Center, Off-Metals, Double Strikes, Clad Layers missing, Die Caps, Double Denomination, etc.

Because of the many differences in each Error Coin we request that you send scans of your coin(s) to us for our examination and firm offer.

Pair of Ethiopia 10 Dollar Silvered Bronze Specimen Pattern Uniface Die Trials

by Mike Byers

This is an extremely rare set of Ethiopian Pattern 10 Dollars. They are a matched set of obverse and reverse uniface die trials from 1972. They were struck in silvered bronze by the Numismatica Italiana Mint. Haile Selassie I is featured on

the obverse with a lion on the reverse. They are 50mm in width and were struck as specimens and are in choice condition with original matching toning. They are housed in oversized PCGS holders due to the large size.

Mint Error News Price Guide

- Updated March 2020 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated March 2020)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,000 - \$1,500	\$1,000	\$3,000	\$1,500 - \$3,000	\$500

Broadstrikes (Updated March 2020)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Partial Collars (Updated March 2020)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes (Updated March 2020)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Denomination	Uniface Obverse XF	Uniface Obverse Unc	Uniface Reverse XF	Uniface Reverse Unc
Large Cent	\$1,500	\$4,000	\$1,250	\$2,000

Bonded Coins (Updated March 2020)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets	5-10 Planchets

Struck Fragments

(Updated March 2020)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000
Lincoln Cent Wheat Ears	\$750	\$2,000
Lincoln Cent Memorial	\$75	\$125

Mated Pairs (Updated March 2020)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps
Lincoln Cent Wheat Ears	\$3,500	\$4,500	\$7,500	–

Mint Error News Price Guide

Transitional Errors (Updated March 2020)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem
Lincoln Cent 1943 Transitional	Copper Cent Planchet	\$75,000	\$100,000	\$200,000	\$250,000

U.S. Gold Errors (Updated March 2020)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$1,000	\$5,000	\$2,000	\$10,000	\$25,000

Indents (Updated March 2020)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated March 2020)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated March 2020)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated March 2020)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages (Updated March 2020)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes (Updated March 2020)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated March 2020)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Off-Metals (Updated March 2020)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Mint Error News Price Guide

Counterbrockages

(Updated March 2020)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Denomination	Circulated	AU	Unc	Choice Unc - Gem
Indian Cent	\$1,000	\$1,500	\$2,000	\$2,500
Lincoln Cent 1943 Steel	\$500	\$750	\$1,500	\$2,000

Fold-Over Strikes (Updated March 2020)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated
Indian Cent Memorial Copper	\$1,000	\$1,250	\$1,250	\$1,500
Lincoln Cent Memorial Zinc	\$750	\$1,000	\$1,000	\$1,250
Jefferson Nickel	\$2,500	\$3,000	\$3,000	\$4,000

Martha Washington Test Pieces (Updated March 2020)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000
Martha Dollar (Sac Planchet)	\$6,000	\$7,500	\$10,000

New Edition of Bart's United States Paper Money Errors Available Now

UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

DR. FREDERICK J. BART

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

New From Krause Publications:

Strike It Rich With Pocket Change

Error Coins Bring Big Money

by Brian Allen & Ken Potter
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit krausebooks.com for more information.

MINTERRORNEWS GLOSSARY

What are Uniface Die Trials?

Uniface Die Trials are deliberate, one sided impressions using either the obverse or reverse die. These Die Trials can be from finished or unfinished dies. Sometimes hubs are used, rather than the actual finished die. Metals other than the adopted composition are frequently used to strike Uniface Die Trials.

This is the only known 1911 Great Britain 5 Pound Die Trial. It was struck on an oversized lead planchet with a width of 44.32mm and is 5.69mm thick. It is a uniface die trial of the finished obverse die used strike the 1911 gold 5 Pound in proof. It was struck in high relief exhibiting a full strike and detail, which is unusual with lead die trials.
