MINT**ERROR**NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our 20th year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,400 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Over the last 20 years with the advent of the internet millions of collectors have flocked to online auctions and dealer websites. Many people connect to various online forums and clubs to share knowledge and learn about Mint Errors. Everyone, including dealers, collectors and even investors have instant access to information as never before. The Mint Error market has experienced an explosion in collector interest over the last 20 years.

Time and again, rare and unique Mint Errors in the numismatic market have made headline news. Authentication and certification of Mint Errors is now commonplace. In 1991, ANACS was the first to authenticate, grade and encapsulate major Mint Errors. In 1999, PCGS and NGC began certifying Mint Errors. Major Mint Errors are now pursued, collected and traded just like patterns, territorial Gold, colonials and other interesting segments of numismatics.

In 1975, I purchased a 1900 Indian Head Cent struck on a \$2 1/2 Indian Gold blank planchet for \$7,750 at a major coin auction. That price ranked among the top five ever realized for a Mint Error that few dealers or serious collectors would even consider. At that time price guides for Mint Errors were nonexistent and today that Indian Head Cent struck in Gold is certified MS65 by PCGS and is valued at six figures.

MINTERRORNEWSTM

PUBLISHER & EDITOR

Mike Byers

Mike Byers (mikebyers.com) is president of Mike Byers Inc. He has been a professional numismatist for over forty years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Owner, Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon. In 2016, Mike Byers was featured on Fox News in an interview with one of his unique mint errors.

Jim Stoutjesdyk

Jim Stoutjesdyk was named Vice President of Heritage Rare Coin Galleries in 2004. Since coming to Heritage in 1993, Jim has assumed a wide variety of responsibilities. He initially was hired as the Gallery Manager for Heritage's retail showroom. For several years he helped to develop Heritage's retail clientele and placed millions of dollars worth of rare coins with collectors. Jim's interest turned to wholesale trading and he quickly became a familiar face at coin shows across the nation. As Vice President, Jim's duties include buying and selling millions of dollars worth of rare coins each month, pricing all of the new coins available for sale each day, and overseeing the daily operations of the rare coin department. In 2019 the American Numismatic Association awarded Jim the very prestigious Doctor of Numismatics honorary degree.

Jim Stoutjesdyk is a Consultant to Mint Error News for U.S. Coins, Unique Items, Patterns and Mint Errors.

Heritage Auctions is the largest collectibles auctioneer and third largest auction house in the world, as well as the largest auction house founded in the U.S. We are also the undisputed Internet leader in our field, with more than 1.75 million online bidder-members registered on HA.com from all 195 countries. This loyal and growing community of collectors is a testament to the usefulness of our website, our reputation for professional business practices and our vast expertise in the field of art and collectibles.

Established in 1976, Heritage offers a wide range of U.S. & World Coins, Rare Currency, Fine & Decorative Art, American Art, Illustration Art, Modern & Contemporary Art, Urban Art, Comic Books & Comic Art, Movie Posters, Entertainment & Music Memorabilia, Jewelry & Timepieces, Luxury Handbags, Sports Collectibles, Historical & Political

Memorabilia, Rare Books & Manuscripts, Ethnographic Art, & Space Exploration Memorabilia, Civil War Memorabilia, Photographs, Nature & Science, Fine and Rare Wine, Luxury Real Estate, Pop Culture Collectibles, and more.

Great Collections holds the record auctioning the famous \$1 Sacagawea obverse muled with a Quarter reverse for \$194,062.50.

Ian Russell is a consultant to Mint Error News for Error Coins and Patterns.

Jim Gately

Jim Gately is the owner of the #1 ranked PCGS registry set of Buffalo Nickels. He also has other registry sets with PCGS.

He purchased the unique 1913 Gold Buffalo Nickel from Mike Byers for \$400,000 and proudly included it in his set.

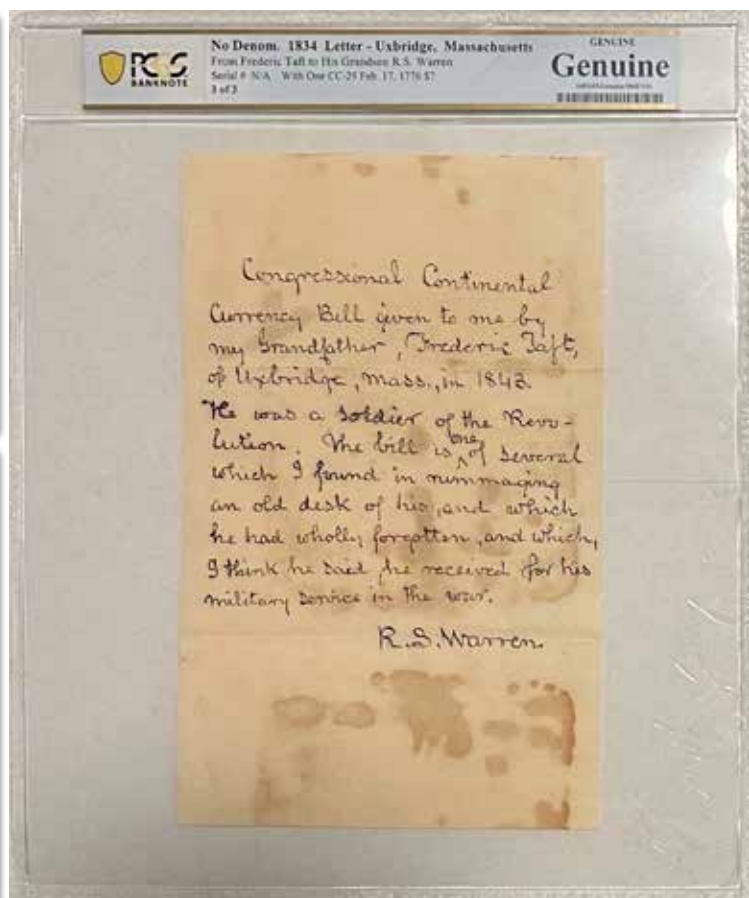

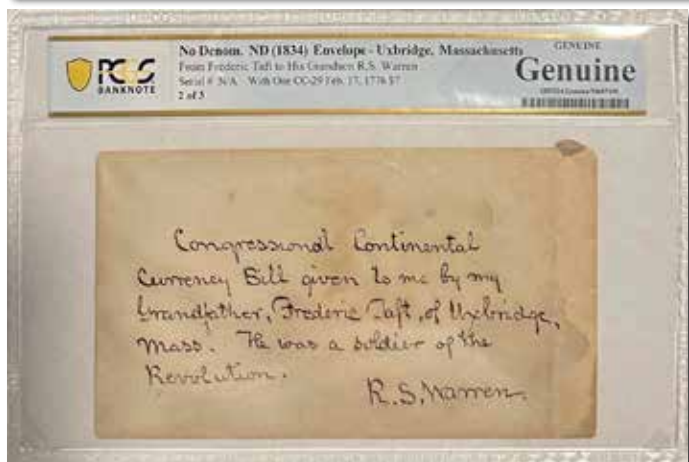

Jim is an expert on 20th Century U.S. coinage with an emphasis on Buffalo Nickels. He is a consultant to Mint Error News for Double Dies and Overdates.

PCGS CERTIFIES \$7 CONTINENTAL CURRENCY NOTE PEDIGREE DATING BACK TO THE AMERICAN REVOLUTION! KEPT IN THE EXTENDED FAMILY OF PRESIDENT TAFT SINCE 1776

by Mike Byers (mikebyers.com)

This unique and historic \$7 Continental Currency Note is accompanied by a handwritten envelope and letter documenting its pedigree back to 1776. It was just authenticated and certified by PCGS and is being

offered for sale for the first time. The fascinating history surrounding this set follows the genealogy tree of the Taft Family dating back to 1640, which includes President William Taft.

PCGS CERTIFIES \$7 CONTINENTAL CURRENCY NOTE WITH PEDIGREE DATING BACK TO THE AMERICAN REVOLUTION!

This \$7 Continental Currency note was in the extended Taft Family since the American Revolution in 1776. This incredible discovery was unknown to the numismatic community until now.

The American Revolution was a movement for independence, including political, social, and ideological change. Between 1765 and 1775 the desire for independence grew, resulting in protests and boycotts including the Stamp Act and Boston Tea Party. The first battles at Lexington and Concord in April of 1775 started the Revolutionary War between the American colonies and Britain.

The Second Continental Congress established the Continental Army which appointed George Washington as its commander-in-chief in June 1775. The \$7 Continental Currency notes were

issued during the American Revolution by the Continental Congress as part of their effort to finance the war against Great Britain. The Continental Congress lacked the ability to levy taxes or generate revenue through other means, so they printed paper money, known as Continental currency, in large quantities to fund the war effort and to pay soldiers. This \$7 note was issued on February 17th, 1776. It was part of the second issue of currency by the Continental Congress.

Ultimately, the Continental Currency became largely useless after the war, contributing to the financial instability of the early United States. The experience of hyperinflation caused by the Continental Currency was one of the factors that led to the adoption of the U.S. Constitution, which gave the federal government the

power to coin money and regulate its value.

On July 4th 1776, the Declaration of Independence was signed. But major battles between the British and American colonies continued until 1781, with the American victory over the British at Yorktown. The War ends officially with the Treaty of Paris, signed in 1783. On March 4, 1789 the new United States Government, which was created by the Constitution officially began operations, replacing the old Articles of Confederation.

This \$7 note was given to sergeant Frederick Taft for his service in the Revolutionary War and stayed in the Taft Family from 1776 until 2025. The letter and envelope written in 1843, document the pedigree of this \$7 note.

The Taft family came from England, Scotland, Ireland and France. The first known ancestor of the Taft family in the United States, Robert Taft Sr., was born in 1640. He began a homestead in Mendon, Massachusetts (circa 1680). Today it is known as Uxbridge, Massachusetts, where he passed away in 1726.

Descendants of the Taft family lived for five generations on farms in Massachusetts before branching out to New York, Maryland and Ohio. Prominent family members include a Governor of Rhode Island, a United States Senator from Ohio, and a U.S. Secretary of Agriculture. The most famous Taft Family member was William Howard Taft, who became the 27th President of the United States.

The Taft family was very prominently represented as

soldiers in the Revolutionary War, mostly in the New England states. Following the Taft genealogy three generations later, Samuel Taft (1735-1816) served in the Continental Army and was the proprietor of a tavern in Uxbridge, now known as Samuel Taft House. President George Washington visited Samuel Taft in 1789 on his inaugural tour of New England. Samuel Taft was the father of Frederick Taft, who was the sergeant in the American Revolution, and the original link to the pedigree of this \$7 1776 note.

Frederick Taft was born on June 19th, 1759. He served in the Revolutionary War as a sergeant in one of the local militia units. Like many small towns in New England, Uxbridge contributed resources, including supplies, food, and ammunition, to the war effort. This was vital in the early stages of the

war, when resources were limited, and each town had to do its part to support the Continental Army. He married Abigail Wood in June of 1782. Frederick and Abigail were the parents of Parla Parilla "Parly" Taft, who was born on March 5, 1798. She married Amory Warren on May 17, 1821.

One of their sons was Royal Sibley Warren (1822-1896) who was the 4th-great-grandson of Robert Taft, Sr. He was a physician and amateur microscopist, who lived in Waltham, Massachusetts. In 1843, R.S. Warren wrote a letter documenting that the \$7 Continental Currency Note from 1776 was given to him by his grandfather, Frederick Taft. In this letter, he also mentions that Frederick Taft was a soldier in the American Revolution and received this note as payment for his service.

PCGS CERTIFIES \$7 CONTINENTAL CURRENCY NOTE WITH PEDIGREE DATING BACK TO THE AMERICAN REVOLUTION!

The Taft family expanded westward over the generations, with one branch of the Taft family settling in Ohio. Alphonso Taft (1810-1891) became a prominent figure in state and national politics. He attended Yale University, where he founded the Skull and Bones society. He later was Secretary of War and Attorney General of the United States. Alphonso's son, William Howard Taft, was born on September 15th, 1857.

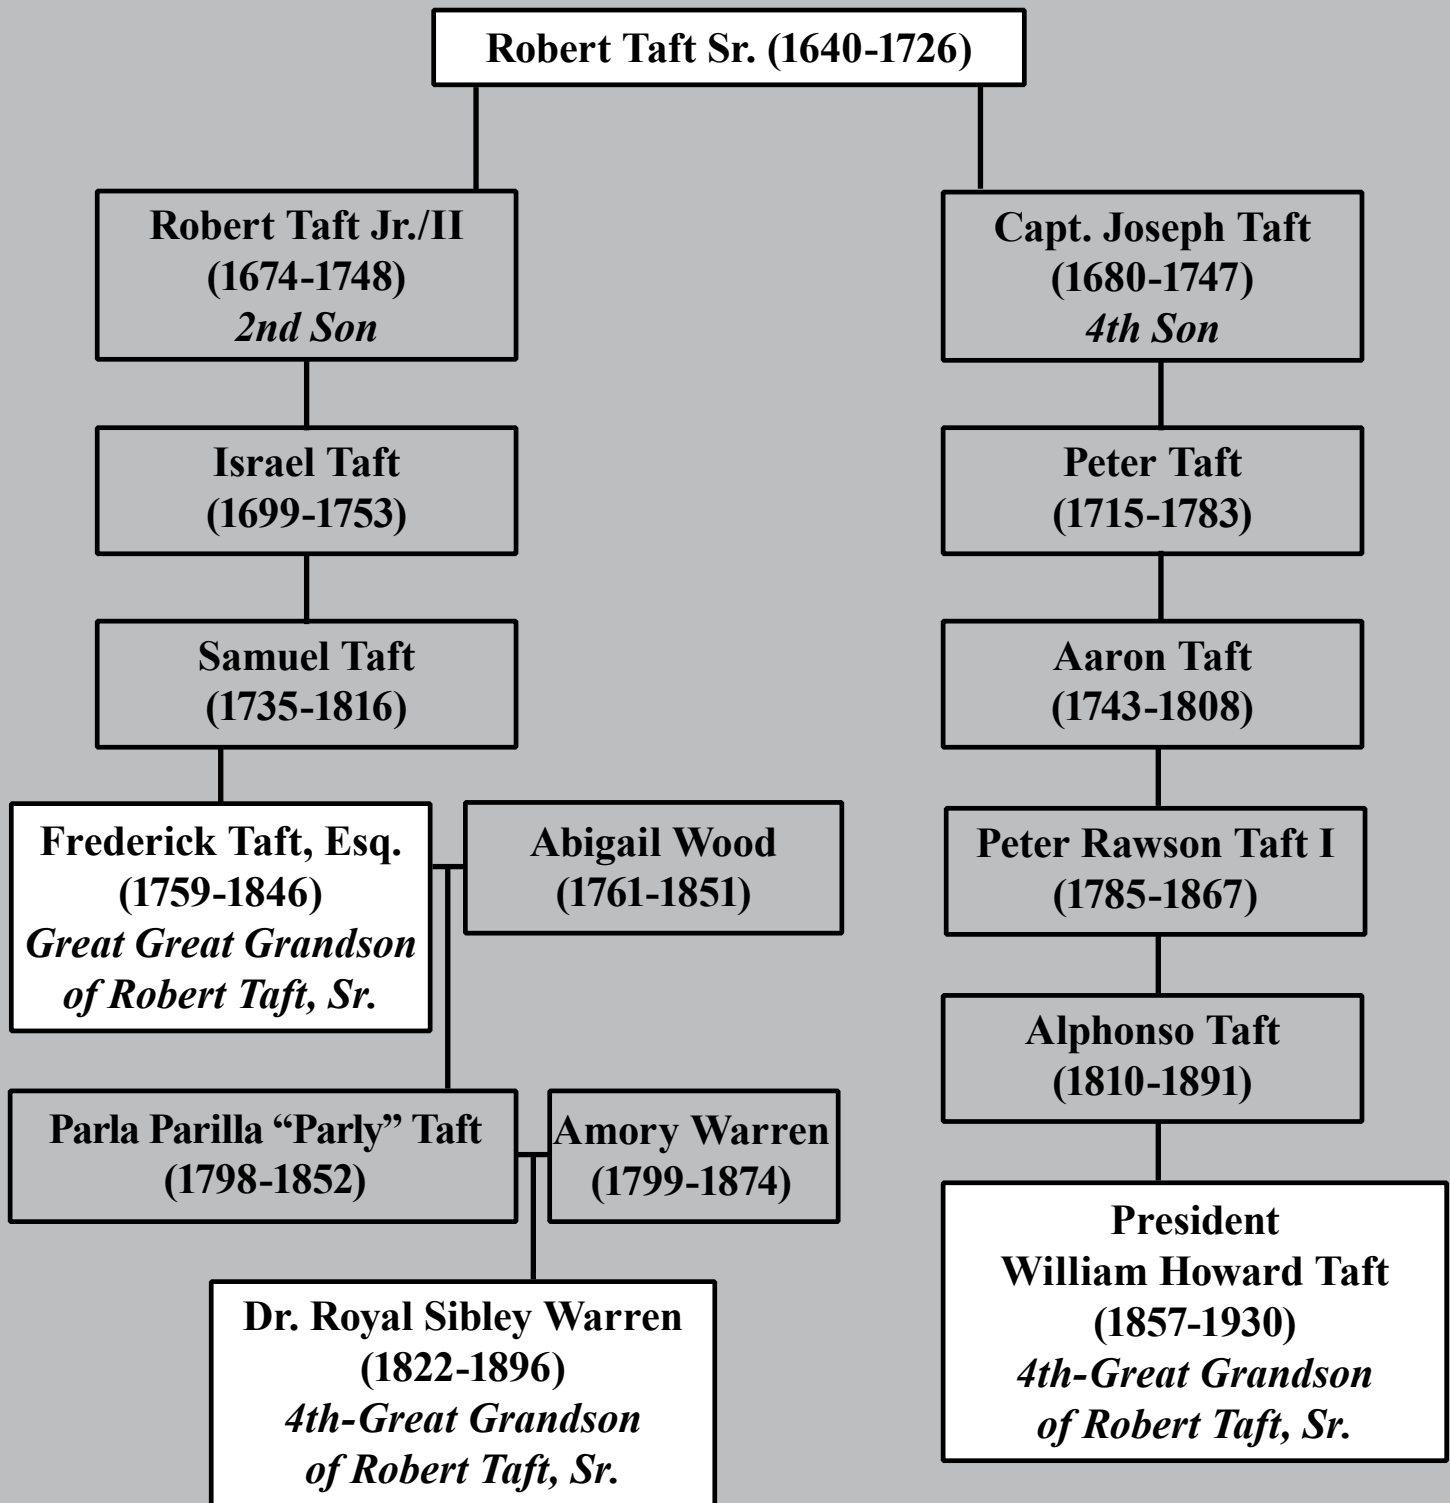

William Howard Taft was the 4th-great-grandson of Robert Taft Sr. He was also a distant cousin to both Frederick Taft and R.S. Warren (Frederick Taft's grandson). He served as the 27th President of the United States from 1909 to 1913 and the tenth Chief Justice of the United States Supreme Court from 1921 to 1930.

The connection of President William Howard Taft to Robert Taft Sr. is documented through genealogical records that span from colonial Massachusetts to the Presidency of the United States.

This \$7 Continental Currency Note, along with the handwritten envelope and letter, was kept by relatives of R.S. Warren and finally sold to a coin dealer in 2025 who submitted this set to PCGS.

It's amazing that this \$7 Continental Currency Note survived in the extended Taft family for 250 years. This unique numismatic discovery belongs in a museum, a collection of U.S. Currency, a collection of American Revolution antiques, or in a collection containing rare items from our nation's history.

The letter reads:

Congressional Continental Currency Bill given to me by my Grandfather, Frederic Taft, of Uxbridge, Mass., in 1843. He was a soldier of the Revolution. The bill is one of several which I found in rummaging an old desk of his, and which he had wholly forgotten, and which, I think he said he received for his military service in the war.

R.S. Warren.

Unique Ike Dollar With Brockage From Ike Dollar Struck On Dime Planchet

by Mike Byers (mikebyers.com)

Unique Ike Dollar With Brockage From Ike Dollar Struck On Dime Planchet

Just certified by CAC and unknown to the numismatic community, this Eisenhower Dollar mint error is unique. It has a brockage from an Eisenhower Dollar that was struck on a Dime planchet.

Since the Eisenhower Dollar struck on a Dime planchet was very thin, the pressure from the Eisenhower Dollar dies expanded the diameter as it was struck into the Eisenhower Dollar planchet. This is an incredibly rare sequence of events.

Somewhere out there is the other half of this mated pair. It would be

an Eisenhower Dollar Struck on 10¢ Planchet. The obverse would have an expanded and distorted portrait of President Eisenhower.

In my opinion, this Eisenhower Dollar is as struck and in original condition with film on both sides. The weakness of IN GOD WE TRUST on the obverse and UNITED STATES on the reverse are due to the lack of die pressure since there was another coin in the collar.

This unique Eisenhower Dollar major mint error belongs in a collection of Eisenhower Dollar errors or unique errors.

Unique Ike Dollar With Brockage From Ike Dollar Struck On Dime Planchet

Part of the expanded and distorted reeding of the brockage from the Eisenhower Dollar struck on a 10¢ Planchet is clearly visible:

PRICES REALIZED IN THE OCTOBER 2025 US COINS SIGNATURE[®] HERITAGE AUCTION

The following mint errors are sold in the October 2025 GACC US Coins Signature[®] Auction #1386.

Images Courtesy of Heritage Auctions, HA.com

1980-D Lincoln Cent, MS64

Struck on a 90% Silver Dime Planchet

Unusual Obsolete Planchet Mint Error

Sold For: \$20,400.00

1980-D Lincoln Memorial Cent -- Struck on a 90% Silver Dime Blank -- MS64 NGC. 2.5 grams. Satiny luster enjoys slight russet overtone, with boldly struck design elements and few marks. The smaller dime planchet is aligned with the left edge of the collar, providing a full rim on that border while the right-hand border lacks a rim entirely. Some distortion of the border legends is caused as a result. The curious nature of this piece transcends a typical wrong planchet error, since the silver dime planchet on which the

coin was struck should not have existed at the Denver Mint after about 1965. Still, at least three 1980-D cents struck on 2.5-gram coin-silver planchets (consistent with a dime) exist. Perhaps a mint employee slipped the planchets into the hopper -- or between the dies -- to stir up a numismatic discovery for eagle-eyed collectors. We sold one of the other pieces in our recent 2025 ANA Signature, graded MS64 NGC, which realized \$18,000.

1800 Silver Dollar, XF45
Double Struck, 2nd Strike 15% Off Center
Scarce 10 Arrows, B-15, BB-195

\$26,400.00

1800 \$1 10 Arrows, B-15, BB-195, R.4 -- Double Struck, Second Strike 15% Off Center -- XF45 PCGS. Ex: The Peh Family Collection. A spectacular mint error on a Draped Bust dollar. We know of only one similar example within the series, a double-struck NGC AU53 BB-196 dollar with the second strike 10% off center. On the present coin, the first strike was apparently normal, but the piece was struck a second time, 15% off center toward 10 o'clock, at 10 o'clock relative to the first strike. Much design detail from the first strike remains, including the date. The pearl-gray surfaces are minimally marked save for moderate contact on the reverse field near the right scroll end. "Bowers Die State II" with clash marks from the bust tip near OF. BB-195 is the sole die marriage of the Guide Book 1800 10 Arrows variety, and it is scarce. Bowers (1993) estimates two to four Mint State examples and only five to ten AU survivors. Herrman (Winter 2024) records only the Amon G. Carter, Jr. coin in Mint State, along with eight coins in AU and another two as XF45.

Ex: FUN Signature (Heritage, 1/2006), lot 3230.

THE WORLD'S LARGEST
NUMISMATIC AUCTIONEER

The “Libertas Americana” Metallurgical Trial Pieces

by John Wang, Mint Error News Consultant

The Joe Zaffern specimen of the 12-sided, roughly nickel-sized Libertas America Metallurgical Trial Piece was sold for \$2587.35 (\$2,202 hammer plus 17.5% buyers premium) in the Numismatic Auctions LLC auction 67 on Saturday, January 28, 2023.

These pieces are fascinating pieces of history. These were previously discussed in Ken Potter’s 1998 article titled “5¢ Size ‘Libertas Americana’ Metallurgical Trial Piece Surfaces.” Since then more specimens have surfaced and this article attempts to list a complete census of the known specimens including nickel-sized pieces, and a cent-sized piece.

5 cent Libertas Americana pattern. Photos courtesy of Numismatic Auctions LLC.

The “Libertas Americana” Metallurgical Trial Pieces

1 cent Libertas Americana pattern. Photos courtesy of Jesse Patrick.

Background

These "Libertas Americana" patterns are extremely interesting and mysterious due to the Libertas Americana motif and a lack of historical records, but having some physical resemblance to other US Mint related issues. In addition to the 12-sided, nickel-sized pieces, there is a single cent-sized Libertas Americana pattern known. These have been discussed in several articles and venues with the general consensus that while no definitive information is available, these are likely to be US Patterns struck using dies made by the US Mint due to their resemblance to other US Mint issues and their date of discovery. From a date perspective, the nickel-sized pieces were struck before the GM roller press pattern cents and share the "2358" number on the reverse with those pieces. A 5 cent sized piece was first published in May 1962 per Numismatic Scrapbook Magazine while the first discussions for the GM roller press cents first started in late 1963 according to Eric M. Larson.

These pieces have been discussed over many years:

- 1962 - Alfred Kramer publishes 5 cent photos in Numismatic Scrapbook
- 1979 - David E. Schenkman publishes 1 cent photos in The Numismatist
- 1985 - Eric M. Larson writes about 1 cent pattern with photos in Coin World
- 1997 - Jesse Patrick publishes article on 1 cent specimen
- 1998 - Ken Potter publishes article on newly discovered Zaffern 5 cent specimen
- 2010 - Jonathan Brecher publishes new 5 cent specimen in discussion thread
- 2023 - Steve Davis documents and sells Zaffern 5 cent specimen

The “Libertas Americana” Metallurgical Trial Pieces

The relationship of these to US Mint issues have been subject to much discussion, including:

1. The image of Lady Liberty has been observed to be similar to and likely based on the US Mint 1945 Assay Medal done by John Ray Sinnock, the 8th Chief Engraver of the US Mint. This has been mentioned by Andrew W. Pollock III (author of *United States Patterns and Related Issues*), Martin Logies (director and curator of the Cardinal Collection Education Foundation), Thomas K. DeLorey (2009 ANA Numismatist of the Year), Ken Potter (editor of *Cherrypickers' Guide To Rare Die Varieties*) and others.
2. The nonsensical terminology used seems similar to the Pollock-4060 GM Roller Press patterns created by Frank Gasparro. Both *Libertas Americana* pieces and the GM Roller Press pieces feature the number "2358" on the reverse. The cent-sized piece and GM pieces also feature the nonsensical text "ACFH KOPRW". The nickel-sized pieces feature similar nonsensical text "ACFLN OPRSV". Additionally the first known appearance of the nickel-sized piece was posted in the May 1962 issue of *Numismatic Scrapbook Magazine* by Albert Kramer, at least 2 years before the GM roller press experiments started. It is speculated that Frank Gasparro would have only used "2358" on his GM pieces if the number was previously used on other US Mint pieces.
3. The reverse devices for the wreath and inner circle areas have similarities between the cent *Libertas Americana* piece and Pollock-4060 as well as the nickel *Libertas Americana* piece and US Mint struck coins for Honduras from 1931-1958.

Ken also covers similarities to Canadian 12-sided pieces issued in conjunction with WWII and the Korean War, and speculates the US may have been doing experiments along similar lines at the time. To summarize, he writes:

The fact is, we have no positive proof of exactly what they represent or who made them. However, we can almost assume with certainty that the dies were produced by the U.S. Philadelphia Mint. Clearly, Gasparro would not have patterned his G.M. "Roller Press - Young Lady's Head" reverse die design, complete with nonsensical legends and the exact four-digit number found on the "*Libertas Americana*" tokens, if they had no connection to the U.S. Mint. It is probable that Gasparro patterned his die from designs available in-house. Of course, one may ask, if Gasparro copied the reverse, why didn't he also copy the obverse of the "*Libertas Americana*" token for his G.M. dies. But it must be pointed out that the "Young Lady's Head" design used by G.M. was created to closely mimic the metal flow of a Lincoln cent design; the bust occupied the same general location, her hair in a "bun" represented Lincoln's beard and nonsensical legends took the place of the date, Mintmark, Liberty and In God We Trust.

[...]

While this article hasn't presented any conclusive evidence as to the exact nature of the tokens or era in which they were produced - there is enough evidence to presume the dies were produced inside the U.S. Mint for experimental purposes and that the two token varieties known thus far represent probable metallurgical trial strikes.

The “Libertas Americana” Metallurgical Trial Pieces

A discussion and visual comparison, along with a census follows.

Libertas Americana Comparison to US Mint Assay Medal

Below are images of Lady Liberty on this pattern and the 1945 Assay Medal done by John Sinnock. The following is a photo of the nickel-sized Libertas Americana piece.

**US Mint Assay Medal - Richard Jewell specimen. Photo courtesy of Stack's Bowers.
5 cent Libertas Americana Pattern - Photo courtesy of Numismatic Auctions LLC.**

Nonsensical Text Comparison to Pollock-4060

The following photos show the identical 2358 text across all the pieces as well as similar nonsensical text.

- The nickel-sized Libertas Americana piece is to the left
- The cent-sized Libertas Americana piece is in the center
- Frank Gasparro's GM roller press pattern is to the right

The “Libertas Americana” Metallurgical Trial Pieces

Photos courtesy of Numismatic Auctions LLC, Patrick Mint, and PCGS.

Of note the cent-sized Libertas Americana piece has more text similarity to Pollock-4060. This may be coincidental ore because both are cent-sized pieces.

- Nickel-sized Libertas Americana pattern: "ACFLN 2358 OPRSV"
- Cent-sized Libertas Americana pattern text: "ACFH KOPRW 2358"
- Cent-sized GM roller press pattern: "AUNHRB ACFH KOPRW 2358 G"

Cent Wreath Comparisons to Pollock-4060

Also of note, is that the wreaths bear similarities between the Libertas Americana pieces and other US Mint pieces. Below is a comparison of the 1 cent-sized piece and Pollock-4060, noting that the leaves, flowers and berries are in the same locations.

Comparison of wreaths including leaves, flowers and berries.

The “Libertas Americana” Metallurgical Trial Pieces

Nickel Wreath Comparisons to Honduras Centavos Coins

It has also been noted that the 5-cent Libertas Americana piece has a reverse wreath and inner circle area very similar to smaller denomination Honduras coins which was minted by the US Mint from 1931 to 1958.

This was noted by Ed. S. on the Collectors Universe message boards.

Honduras is listed in the US Mint struck foreign coinage list maintained by Mint Error News here:

https://minterrornews.com/foreign_coinage_production_figures.pdf

Comparison with 1957 Honduras 1 Centavo.

The “Libertas Americana” Metallurgical Trial Pieces

Physical Description

The following information is summarized from Ken Potter, Jonathan Brecher, and Steve Davis.

Specimen	Composition	Diameter	Weight	Specific Gravity	Die Alignment
1 cent	homogeneous and highly magnetic steel alloy	19 mm	2.8 g	7.657	Coin turn, rev rotated 200 deg clockwise
5 cent (Zaffern)	three bonded/clad layers with a magnetized steel core and two outer cupro-nickel layers	20.775 mm	4.54 g*	7.9	Coin turn, rev rotated 200 deg counter- clockwise
5 cent (Brecher)	copper-plated aluminum	20.8 mm	1.478 g	Unknown	

* Ken Potter indicated the Zaffern specimen had the approximate specifications of a "Canadian war-time 'steel' 5¢ piece." 4.54 grams is the weight of a Canada war-time chrome-plated steel 5 cent piece. This is the same weight the Canada 5 cent piece had from 1922 to 1981.

Ken Potter describes the Patrick 1 cent specimen as:

The 1¢ size specimen is described by Patrick as having a plain smooth edge, being approximately the same diameter, thickness and weight of a U.S. zinc coated steel cent; the token being 2.8 grams in weight, 19 mm in diameter and struck in an apparently homogeneous and highly magnetic steel alloy with a specific gravity of 7.657. (For comparison, a 1943 "steel cent" weighs 2.7 grams and has a specific gravity of 7.80, is 19.05 mm in diameter and is composed of zinc plated steel.) It is struck in "coin alignment" (though its reverse is rotated approximately 200 clockwise). It should also be noted that the "Patrick Specimen" is the identical piece reported upon in David Schenkman and Joseph Levine's, Exonumia Notebook column in the May 1980 issue of the American Numismatic Association's, The Numismatist (pg. 1070). As such, the 1¢-size variety may be unique.

The “Libertas Americana” Metallurgical Trial Pieces

Ken Potter describes the Zaffern 5 cent specimen as:

The "Mellon specimen" is 12-sided (though it does look somewhat round when viewed straight on), and is of the approximate size and specifications of a Canadian war-time "steel" 5¢ piece. The token, (being difficult to obtain an exact measurement of, due to variances on its edge), is approximately 20.775 mm in diameter (taken from top to bottom, i.e., 12:00 to 6:00), is struck on a probable cupro-nickel plated steel planchet with a specific gravity of 7.9. Its edges are rough and granular, and in some areas recessed, with the planchet being comprised of three bonded layers similar to our current "sandwich metal" clad coins. The planchet is highly magnetic, exhibits a shell that is extremely similar if not identical in color to our current clad coinage (and homogeneous cupro-nickel 5¢ piece), and shows a dark core with obvious traces of surface-rust that is indicative of steel. It is struck in "coin alignment" with its reverse rotated 200o counter-clockwise. Its obverse appears to exhibit more basined fields than the 1¢-size variety.

Jonathan Brecher describes his 5 cent specimen as:

This piece appears to be copper-plated aluminum. The obverse and reverse are bright copper color, while the edge is aluminum color. It is very light, 1.478 grams, and 20.8 mm diameter. It is 12-sided. The text on the reverse reads ACFLN / 2358 / OPRSV

The “Libertas Americana” Metallurgical Trial Pieces

Census & Cataloging

While the Frank Gasparro Lady Liberty pattern has been cataloged as Pollock-4060, the cent and nickel-sized Libertas Americana patterns have not been cataloged yet in Judd or Pollock.

In the absence of catalog numbers, this article assigns some catalog numbers for these specimens.

It appears there may be 4 known specimens of the 12-sized, nickel sized piece:

1. (WB LA-P-5.1) Albert Kramer specimen (first published in May 1962 issue of Numismatic Scrapbook Magazine)
2. (WB LA-P-5.2) Joe Zaffern, Greg Mellon, Steve Davis (Numismatic Auctions LLC) specimen (first published in 1998 article of Ken Potter's Educational Series)
3. (WB LA-P-5.3) Jonathan Brecher specimen (first published in 2010 Collectors Universe message boards)
4. (WB LA-P-5.4) eBay specimen

Additionally, there is one known specimen of the cent sized piece:

5. (WB LA-P-1.1) Jesse Patrick specimen (first published in May 1980 issue of The Numismatist)

The “Libertas Americana” Metallurgical Trial Pieces

WB LA-P-5.1. Nickel-size Kramer Specimen

The earliest known appearance of these pieces is in 1962 when Albert Kramer posted an article in the May 1962 issue of the Numismatic Scrapbook Magazine asking for information on this piece. A copy of the magazine issue was recently acquired and scanned by the author.

Photo courtesy of Albert Kramer. Scan performed by John Wang.

The “Libertas Americana” Metallurgical Trial Pieces

Photo courtesy of Albert Kramer. Scan performed by John Wang.

The “Libertas Americana” Metallurgical Trial Pieces

WB LA-P-5.2. Nickel-size Zaffern-Mellon-Davis Specimen

Ken Potter’s 1998 article mentions the discovery of the Joe Zaffern specimen, which was subsequently acquired by Greg Mellon and most recently sold by Steve Davis of Numismatic Auctions LLC. The 2023 photos of the show the same reverse diagnostics as the Zaffern-Mellon specimen in Potter’s 1998 article.

These photos of the Zaffern-Mellon specimen are taken by Numismatic Auctions LLC. In discussion with Steve Davis of Numismatic Auctions, this specimen has a copper-nickel color.

Photo courtesy of Numismatic Auctions LLC

The “Libertas Americana” Metallurgical Trial Pieces

Photo courtesy of Numismatic Auctions LLC

The “Libertas Americana” Metallurgical Trial Pieces

WB LA-P-5.3. Nickel-size Brecher Specimen

Jonathan Brecher posted photos of this specimen to the Collectors Universe message forums on July 30, 2010 in the following thread and described the piece as likely being copper-plated aluminum where the “obverse and reverse are bright copper color, while the edge is aluminum color. It is very light, 1.478 grams, and 20.8 mm diameter. It is 12-sided.”

Forum thread:

The “Libertas Americana” Metallurgical Trial Pieces

WB LA-P-1.1: Cent-size Patrick Specimen

Currently, there is one cent-sized specimen known, owned by Jesse Patrick, owner of the Patrick Mint. It was published by Jesse in 1997 and by Ken Potter in 1998. As noted, this piece has more similarity in the nonsensical text when compared to the GM roller press experimental patterns: “ACFH KOPRW 2358”. The piece is offered at \$3,495.00.

This piece first appeared in the August 1979 and May 1980 issues of The Numismatist, followed by the Jan 1995 FUN Convention, a 1997 Patrick Mint article and the 1998 Ken Potter article.

The “Libertas Americana” Metallurgical Trial Pieces

26mm Pennsylvania LYPPE Grinolds Specimen

In the July 23, 2017 issue of E-Sylum, Volume 20, Number 30, Dick Grinolds posted a piece that has similar markings as Pollock-4060, which is summarized here. The obverse text reads: “LYPPE ES MYSOR SIKHTE ODI G.” It has a reeded edge and weighs 7.4 grams. The diameter is 26mm which is slightly larger than a Washington Quarter with a diameter of 24.3 mm and the 1884 Pennsylvania Bi-Centennial medal with a diameter of 25 mm.

The reverse has the Coat of Arms of Pennsylvania, in what looks very similar to the central device on the reverse of the 1882 Pennsylvania Bicentennial medal cataloged as Julian CM-18. A speculation is that CM-18 was done with a two-part die and the that the center portion of the Coat of Arms is the same on this piece and CM-18 as the latter was offered by the U.S. Mint as a product at least until 1969 as (Mint List No. 613).

This piece was shown to John “JD” Dannreuther, Saul Teichman, and Fred Weinberg, none of whom had seen a piece before. According to Dick Grinolds, Fred Weinberg observed “the reeding within the reeding” and the denticles, concluding that neither would preclude it from being a U.S. Mint struck piece.

While not a Libertas Americana piece, this is included to provide a full reference for these nonsense text pieces. Read the article on E-Sylum for more information.

Previous Articles

Many of the references used are easily available online as noted in the next section on References, however, some articles in older magazines are not directly linkable and are included here for reference.

May 1962 Article: Numismatic Scrapbook Magazine

The following is from page 1295 with the following text:

What Is It?

Albert Kramer, New York City, furnished the accompanying photo, in hopes someone can identify it. The head is somewhat similar to that used on early U.S. coins.

The “Libertas Americana” Metallurgical Trial Pieces

August 1979 and May 1980 Articles: The Numismatist

David Schenkman and Joseph Levine ran the Exonumia Notebook column in The Numismatist. David wrote the following on page 1685 of the August 1979 and page 1070 of the May 1980 issues.

Old issues of The Numismatist have been digitized by the Newman Numismatic Portal here:

- August 1979, page 1685: <https://nnp.wustl.edu/library/book/527595>
- May 1980, page 1070: <https://nnp.wustl.edu/library/book/527614>

August 1979

May 1980

What Is It?

Several months ago the illustrated item was sent to us by a reader in Florida. He had taken it to several coin shows, and nobody had been able to tell him what it was. We can't either and hope that a more knowledgeable numismatist in whatever specialty it belongs will be able to identify it.

The obverse design certainly is suggestive of some of our country's early coinage; the reverse inscription, ACFH KOPRW 2358, makes no sense at all (at least to me). The piece is 19mm and is struck in a nickel composition (possibly pure nickel — it is strongly attracted to a magnet). — D.E.S.

“What Is It” Identified

In the August 1979 “Exonumia Notebook” column a piece was illustrated which was owned by a collector who had been unable to learn anything of its origin. As a result of many letters from readers of this column, the mystery has been solved.

According to our correspondents, the piece was struck in the late 1960s on a roller press developed for the U.S. Mint by General Motors. Dies were made to approximate actual coins, but with meaningless lettering so that they could not be mistaken for real coins. The number struck has not been learned.

Coin World had a story on these “coins,” and they illustrated a different variety from ours. Their piece had been found in circulation “in the general area of the GM plant that worked on the press.” Evidently some pieces were kept by GM employees.

D.E.S.

The “Libertas Americana” Metallurgical Trial Pieces

May 29, 1985 Article: Coin World

In 1985, Eric M. Larson wrote a six and a half page article on the GM roller press experiments for Coin World titled “Goldfinger’ preview for Treasury officials gives birth to Mint, General Motors roller press testing.” Near the end of the article there was a short discussion of the 1 cent Libertas Americana piece where Eric expresses his opinion that the 1 cent specimen could not have been a roller press piece since it seems to have been made of steel, which would have been too hard and broken the dies of the roller press. Here is a short excerpt of the article covering the Libertas Americana pattern from page 72 and 75.

California dealer Jesse Patrick recently publicized in *Coin World* and *Numismatic News* an experimental “one cent” issue which he identifies as a product of the GM roller press, but I believe the attribution to GM is incorrect. The reason is that the “Libertas Americana” issue, as Patrick has described it, “appears to be struck from a steel alloy, as it is highly magnetic and steel in color.” The piece is further described as measuring about 0.748-inch in diameter and weighing about 2.8 grams. The reverse bears some – but not all – of the same inscriptions which appear on the Lady Head piece, and denticles around the inside rim which do not. The obverse design’s similarity to Augustin Dupre’s Libertas Americana medal, struck in the late 1700s (but without Liberty cap and pole), has no obvious connection to the GM pieces.

If the Libertas Americana issue is made of steel, that fact would virtually preclude it from having been struck on the roller press at the Tech Center. Putting steel through the roller press would have broken all of the dies “immediately,” several former Tech Center employees stated emphatically. “It requires tremendous pressure to strike coins out of steel,” one stated, “like 10 times as much as copper. The roller press wasn’t designed for steel, wouldn’t have worked with steel, and it would have been unthinkable for anybody to have fed steel through it. There wasn’t enough pressure to strike coins like that in steel.”

A more likely explanation is that the Libertas Americana issue was struck at the Philadelphia Mint, as part of its experimentation with other metals to strike cents. “A steel piece couldn’t have been

Coin World May 29, 1985 article continued.

JESSE PATRICK discovered this piece, which resembles the GM roller press piece series but which author Eric M. Larson believes is not a part. (Photo courtesy Jesse Patrick)

72

COIN WORLD, Monday, June 5, 1995

struck at the Tech Center using the [roller press] machinery we had," he said.

Since the reverse of the *Libertas Americana* piece bears a design used by the Mint for experimental or trial coins, it is reasonable to conclude the dies for this issue

were made by the government. But it seems very unlikely that the *Libertas Americana* issue was produced by the roller press at the Tech Center. In visually comparing the *Libertas Americana* issue with

Please see **GM** Page 75

GM from Page 72

the early roller press issues, it may be tempting for some people to conclude that the *Libertas Americana* issue was also a roller press issue. At this juncture, there is insufficient evidence for me to conclude that the *Libertas Americana* piece is an issue from the GM roller press.

The “Libertas Americana” Metallurgical Trial Pieces

1997 Article: The Patrick Mint

The following is the full text of the 1997 article posted by Jesse Patrick to patrickmint.com, reprinted with his permission.

EXTREMELY RARE & IMPORTANT EXPERIMENTAL ONE CENT PIECE

UNDATED experimental one cent piece. If not struck at the U.S. Mint itself then undoubtedly struck by a private firm at the mint's direction, possibly from mint prepared dies. The goal of this experiment may have been the development of a new type of coining press and/or metal alloy for use by the U.S. government. The obverse has a plain border with a head of Liberty, facing left, with flowing hair. The design is very similar to the famous Libertas Americana medal, lacking the Liberty Cap and pole, originally designed by Augustin Dupre' near the end of the eighteenth century. Of American coins the device most resembles the 1792 disme. The reverse appears to be a wreath of cotton tied with a bow of ribbon at the base all within a denticled border. Inside the wreath is the nonsense legend in three lines: ACFH / KOPRW / 2358. This plain edge piece is approximately the same thickness as a U.S. penny, weighs 2.8 grams, is 19mm (.748 inches) in diameter and struck in a steel alloy. This last is indicated by a specific gravity of 7.657, the fact that it is highly magnetic and steel in color. The die alignment is the same as a U.S. coin although the reverse is positioned off 20 degrees in a clockwise direction. These dimensions and properties compare closely with the 2.7 grams and 19mm diameter given by Yeoman in his Guide Book of U.S. Coins for the 1943 zinc coated steel cents and form the basis for our conjecture that this interesting coin was intended to be a cent. Sharply struck, about uncirculated condition with some original mint luster remaining. We note two light rust spots in the reverse field over AC and below right ribbon end which serve to identify this specimen. A very important coin and currently the only specimen we know of. Unlisted in the recent Pollack book on U.S. pattern coins.

\$3495.00.

The “Libertas Americana” Metallurgical Trial Pieces

The composition of this piece suggests that it originated during World War II when the U.S. Government was searching for alternative metals to replace the copper used in U.S. coinage, particularly the cent. In spite of this, we think it is far more likely that this coin had its origin in the early 1960's during the coin shortage in this country. At that time General Motors was experimenting with the manufacture of a roller press to dramatically increase coin production for the U.S. Mint. The reverse die closely matches the known General Motors roller pennies in the composition of the wreath and includes the same three lines of nonsense legend. The most notable differences are another, smaller line of nonsense, the addition of the letter G and the lack of reverse denticles around the border. This very interesting and important experimental cent resurfaced at the January, 1995 FUN Convention in Orlando, Florida. Prior to its rediscovery, this identical specimen (identifiable by the above mentioned rust pits) was last reported on page 1070 of the May, 1980 issue of the Numismatist where it was pictured. A photo of a similar piece was submitted by Albert Kramer of New York City and published in the May, 1962 Numismatic Scrapbook Magazine on page 1295. That coin was perhaps struck from the same obverse die but had an entirely different reverse. Both reverses had the same numerals, 2358, but the wreaths differ as well as the border treatment and nonsense legend. The whereabouts of that piece is unknown, as is its composition and vital statistics. Other similar General Motors roller pieces, commonly referred to as “pennies”, were struck from different obverse dies and are occasionally encountered at coin shows and in auctions. The above specimen is significant because it was struck from different dies than the “pennies” as well as a completely different composition. The piece is unlisted in the recent Pollack book on U.S. pattern coins which features such pieces in an appendix.

Private Mint News

Private mints and their issues have a long and illustrious history, but it is often hard to assemble, often years later without good documentation. When working with sovereign mints like the United States Mint, there is often a lot of archives and records available to research which is not available for private mints.

To address this, Private Mint News is a new online publication focusing on numismatics from by private mints. Private mint issues or creations, often in the form of tokens and medals called exnumia, is a rich and evolving area, however, research information can be thin on both classic and recent issues, especially the latter. The goal of Private Mint News is to assist in rectifying this situation by documenting and discussing issues from Private Mints of all eras.

Coverage includes private mints issuers of all eras and locations with an initial focus on the United States. Modern issuer coverage will include Daniel Carr of Moonlight Mint, Ron Lands of Gallery Mint Museum, Jared Grove of Grove Minting, Provident Metals, and other issuers. Classic issuers will include issuers of tokens, medals and coins including Civil War Tokens, So-Called Dollars, Territorial and Pioneer coins as well as Private Patterns.

CERTIFIED BUT NOT GRADED: ADJUSTMENT STRIKES, STRUCK THRUS & OTHER MINT ERRORS

BY NGC

There are a few types of error coins that are eligible for NGC certification, but do not receive a grade. Learn more about what coins fall into this category of “MINT ERROR” and why.

There are a few types of error coins that are eligible for NGC certification but do not receive a grade. These coins are simply attributed as MINT ERROR on the certification label without any grade notation. This of course can be a source of questions, and the information here describes which coins fall into this category and why.

There are two basic categories of error coins that are certified by NGC but do not receive a grade.

First, coins that, as a result of the error, lack enough detail to be graded. And, second, mint errors that were never struck by the dies. The reason that these mint errors cannot be graded is simple. Strike is a central component of grade and in the absence of this information a precise grade cannot be assigned.

The first category involves a few basic error types: die adjustment strikes, split planchets, and struck thrus (although other errors can be included in this group).

Die adjustment strikes, as the name implies, are used to set the distance and the pressure of the dies to the planchet. In this stage of operation, there can be a noticeable lack of detail to the coin. This lack of detail will prevent the coin

from being eligible for grading, although it can be readily and accurately attributed. The edge of a die adjustment strike will be either weak or missing. This is an important difference from a struck thru which has full edge detail.

1976-D half dollar, die adjustment strike, obverse. Low pressure did not allow for all of the details of the coin to be present.

1976-D half dollar, die adjustment strike, reverse.

1976-D half dollar, die adjustment strike, edge view. Note that the reeding is either weak or missing from the edge of the coin.

Coins struck on **split planchets**, when the split occurs before striking, can appear very similar to die adjustment strikes. They will exhibit a varying degree of weakness to the obverse and reverse depending on the thickness

of the planchet. This weakness at times will prevent the coin from exhibiting enough detail to be graded. Unlike die adjustment strikes, the edge of the coin will be normally formed but will not be of the proper thickness.

1956-D Lincoln Cent, struck on split planchet.

Next we come to the **struck thru** errors. This group of errors is the most confusing, not only because of the grading issue, but also for attribution. Inherent in the manufacturing of coins are items like oil, grease and dirt. While oil and grease are necessary to allow machines to function properly. They become a detriment when they interfere with the minting process. A struck thru is quite simply when a foreign substance comes between die and planchet (coin blank) at time of striking.

The occurrence of struck thrus on circulating coinage is not rare, and minor examples are fairly common. Although these coins may not have been manufactured “perfectly,” the reality is that the mint does not hold these coins back from circulation. Most of these “minor flaws” will never be

noticed by the general public and once circulated they become even less apparent. For this reason, NGC does not certify minor struck thrus as being mint errors if they are minor and therefore acceptable within mint tolerances. This is especially true with the statehood quarter series. NGC does not attribute coins where only one letter or number is obstructed, or when the obstruction is very weak (or partially struck thru which makes a small portion of the design visible but “blurry”). Obstructions that impede a large area or are significant will be noted. The location and size of the struck thru will determine whether there is enough detail to grade the coin, or if it will simply be attributed as a mint error without grade. Some of the most dramatic struck through mint errors are not graded.

The reverse of a Wheat Cent, struck thru grease, rendering some portion of the design blurry or obliterating it completely.

The obverse of a Proof 2005-S Jefferson Nickel, with a large struck thru of foreign material. The highly mirrored surface of proof coinage makes struck thrus of this type especially dramatic.

Obverse of a State Quarter struck through grease. Note the resemblance to a die adjustment strike, except the reeded edge is full. Struck thrus can also affect just one side of a coin, while a die adjustment strike will show weakness on both.

Reverse of a Virginia State Quarter, struck thru.

A 2006 Silver Eagle, most likely struck thru plastic die cap. The matte-like surface of this issue makes such errors especially dramatic.

Lastly, we come to **blanks** and **planchets**. Since these items never made it to the coining press and struck, they lack any detail. Therefore, blanks and planchets are attributed by NGC but never graded.

A Lincoln Cent planchet.

A Sacagawea Dollar or Presidential Dollar planchet.

uspatterns.com

The Society of U.S. Pattern Collectors is dedicated to the study of many of the rarest coins struck at the U.S. Mint: patterns, die trials and experimental pieces.

Welcome to The Society of U.S. Pattern Collectors!

For those of you not familiar with this fascinating area of numismatics, patterns are prototypes for coins that, for the most part, were never approved for circulation. Most patterns are very rare, some unique, and others unknown outside of museums.

A good place to start learning about these pieces is our Beginner's Corner which includes a page on How to use this Website or the Photo Gallery which contains examples of many of the different pattern issues.

The United States Mint produced more than 1000 different patterns, as well as many die trials and experimental pieces. Despite the great rarity of many of these individual items, the great variety makes the series surprisingly collectable.

There are relatively few collectors specializing in United States pattern coinage. Most of these collectors target specific areas. For example, there are collectors who specialize in Indian Cent patterns, others collecting Morgan dollar patterns, and so on.

In addition to these specialists, there are thousands of collectors of regular issue United States coins who try to buy a few patterns to complement their collections. Many of these historical coins have wide appeal and are surprisingly affordable. There are many collectors who, for example, would like to own an 1855 Flying Eagle large cent (J-167, about 500 pieces struck) to go with their collection of large cents or with their collection of Flying Eagle small cents.

1984 Mint Error Catalog

Editor's Note: Here is another in a series of Mint Error Catalogs from Fred Weinberg when he was with Numismatics, Ltd. It is always exciting to compare current mint error prices with those from decades ago. Mint Error News Magazine thanks Fred Weinberg (fredweinberg.com) for sharing these with our readers.

PCGS CoinFacts

Your Online Reference for U.S. Coins

PCGS CoinFacts includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

A Spectacular German Mint Error

by Martin Wettmark

Here is a spectacular German mint error that I wanted to share with the readers of Mint Error News.

It is a German 1 Pfennig from former West Germany and is from 1988, two years before the unification of the two parts of Germany.

As you can see, the coin has four obvious errors. First an off-center strike and second a clipped planchet. It also has an off-center double strike and the second strike is a brockage! I have not seen many error coins with so many clear "dramatic" errors as this one before.

A Spectacular German Mint Error

A Spectacular German Mint Error

COINWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

Mint Error News Price Guide

- Updated October 2025 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated October 2025)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$500	\$1,000	\$1,500	\$2,000	\$500
Proof Jefferson Nickel	\$1,000	\$1,000	\$2,500	\$2,000	\$1,000
Proof Clad Dime	\$1,000	\$1,500	\$2,500	\$2,500	\$1,250
Proof Clad Quarter	\$1,000	\$1,500	\$2,500	\$2,500	\$1,250
Proof Clad Half	\$2,500	\$2,000	\$5,000	\$1,500	\$2,000
Proof Ike Dollar	\$15,000	-	\$25,000	-	\$4,000
Presidential Dollar	-	-	-	-	3 Known

Mint Error News Price Guide

Broadstrikes (Updated October 2025)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Denomination	(Small) XF/AU	(Small) Unc	(Large) XF/AU	(Large) Unc

Partial Collars (Updated October 2025)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes (Updated October 2025)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Bonded Coins (Updated October 2025)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets	5-10 Planchets

Struck Fragments

(Updated October 2025)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000
Lincoln Cent Wheat Ears	\$750	\$2,000

Mated Pairs (Updated October 2025)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps

Transitional Errors (Updated October 2025)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

U.S. Gold Errors (Updated October 2025)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center

Indents (Updated October 2025)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated October 2025)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated October 2025)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated October 2025)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages (Updated October 2025)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes (Updated October 2025)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated October 2025)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Denomination	10% - 15% XF/AU	25% - 60% XF/AU	10% - 15% Unc	25% - 60% Unc

Off-Metals (Updated October 2025)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

Counterbrockages

(Updated October 2025)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Fold-Over Strikes (Updated October 2025)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated
Indian Cent Memorial Copper	\$1,000	\$1,250	\$1,250	\$1,500

Martha Washington Test Pieces (Updated October 2025)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$1,000	\$1,500	\$2,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$1,000	\$1,500	\$3,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$5,000	\$7,500	\$10,000
Martha Dollar (Sac Planchet)	\$1,000	\$1,500	\$2,000

CONECA

The Combined Organization
of Numismatic Error Collectors of America

CONECA is an international numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational journal, The ErrorScope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers attribution services. The service enables members and non-members to send their coins directly to an authorized CONECA attributer.

CONECA Error Examination Services

CONECA offers examination services. The service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification.

MIKE BYERS INC

MIKEBYERS.COM

U.S. & WORLD MAJOR MINT ERRORS

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be certified by PCGS or NGC and have a minimum value of \$5,000 each. All U.S. Mint Errors must be dated prior to 2002.
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

NLG Award: Best World Coin Book

RON GUTH, C.P.A.
German coin specialist

Ron Guth, Numismatic Expert

Ron Guth is a recognized authority on United States and German coins. He is a licensed Certified Public Accountant who has been involved professionally in numismatics for over fifty years as a collector, dealer, researcher, and writer. His books and articles have earned numerous awards, including the American Numismatic Association's Heath Literary award and the Olga & Wayte Raymond awards, the Numismatic Literary Guild's Best Numismatic Investment Book and Best Book of the Year awards, and the Professional Numismatic Guild's Best Book of the Year award. In 2003, Ron received the prestigious President's Award from the American Numismatic Association in recognition of his numerous contributions to numismatics. In 2021, Coin World named Ron as one of the Top Ten Most Influential People in Numismatics for the sixty-year period from 1960-2020.

Ron created the CoinFacts website (now PCGS CoinFacts) in 1999 and sold the website to Collectors Universe in 2004 (where it is now presented as PCGS CoinFacts). Ron served in various capacities at Collectors Universe, including Director of Numismatic Research, President of the Professional Coin Grading Service, and President of PCGS CoinFacts.

Currently, Ron serves as proprietor of GermanCoins.com and as Chief Investigator at the Numismatic Detective Agency, where he provides expert provenance on high-end coins.

MINSHULL TRADING

The Principal Owner Lee Minshull has been in the business for over 40 years. Other Partners Brian Hodge (President of Numismatics, PNG) and Balazs Csaki (Chief Financial Officer) have added tremendous value to this legacy. Over the last three decades we have been a leader in the numismatic industry and have grown into a formidable market maker, garnering the respect of every major market player.

We establish and support markets that our customers can rely on, from “Top 100 U.S. Coins” to the most recent U.S. Mint modern releases. We take pride in our unmatched customer service and are recognized industry-wide for our immediate payment.

We are members of every major numismatic organization in the country, including PNG, ICTA, FUN, CSNS, and life members of the ANA. We are a regular Red Book contributor and maintain consistent and up-to-date pricing to sustain healthy markets.

Minshull Trading boasts over \$2.5bn in sales to date and has over 100 years of combined numismatic experience that our customers have come to rely on as a trusted source. We earn repeat business because we do what we say, every time. Give us a call today and find out what sets us apart.

MINSHULL TRADING

1892-O 50¢ NGC SP 66★

\$125,000

SPECIMEN STRIKE. The Finest of 3 Known! Likely struck as a commemorative beginning of the Barber series! SP66★! For many years this coin has been touted as a “Branch Mint Proof” or at least something “very special” from the likes of Walter Breen, David Hall and the catalogers and auctioneers who have placed it on the market in the past. Clearly, consensus has been that this coin IS the Branch Mint Proof it has been proclaimed to be, but since mint records were so sparse in those days there is no existing documentation as to exactly why it was prepared. Of course, a few very plausible conclusions can be made. It’s 1892. It’s the first year of the Barber design and the inauguration of it at the New Orleans Mint, who would have had no reason not to show their prowess in creating a coin of this magnitude.

An Exciting New Mint Error Book:

Mint Errors to Die For

A Sampling and Explanation of More Than 250 Error Coins That Escaped the U.S. Mint

Some of the Features in *Mint Errors to Die For* Include:

- Coverage and definitions of numerous error types.
- Detailed explanations on the causes of various Mint errors.
- Dozens of high definition photos to help guide you on what to look for.
- Tools and resources needed to get started as a Mint error collector.
- Why it's important to learn and understand the minting process.
- Methods to help you detect counterfeit and altered coins made to resemble errors.
- How to assess if "damage" on Mint errors is considered desirable or undesirable.
- Suggestions on how to learn the value of your error coins.
- Interesting snippets of "Coin Trivia" and American History.
- Error collecting "Dos" and "Don'ts" that will help save you time, money, and pain.

Mint Errors to Die For

A Sampling and Explanation of More Than
250 Error Coins That Escaped the U.S. Mint

Non-gold Coins Struck on Gold Planchets

1913 photos PCGS® used by permission at PCGS.com/
CoinFacts; NGC label photo courtesy of MikeByers.com

Coin Trivia: Though the 1913 Buffalo nickel is on a \$5 gold Half Eagle planchet, Mint errors on \$2.5 gold planchets include: Indian Head Cents: (3) 1900, 1905, 1906, and 1907. Lincoln Cents: 1911, 1915, and 1927

1913 (Type 2) Buffalo Nickel:

Struck on a \$5 Gold Half Eagle Planchet

Though there are nine known cents (six Indian Heads and three Lincolns) struck on gold Quarter Eagle (\$2.5) planchets, this is the only known Buffalo nickel struck on a gold planchet of any type; in this case, it's likely a \$5 gold Half Eagle planchet. (Some speculate it was made intentionally as were the five known 1913 Liberty nickels). Sadly someone cut into the rim on the reverse at 8 o'clock (see photo below) likely to prove it's just another plated novelty coin. Now even if you're 99.9% sure your suspect coin is a fake, don't ever, ever do that! As a result, PCGS gave it a "Genuine/AU Details" grade. It's no surprise that the psychological impact of PCGS' grade adversely affected its initial selling price: \$78,000 at Heritage Auctions in January of 2021 – a heck of a lot less than what many experts expected despite the damage.

In an interesting twist, Las Vegas rare coin dealer Mike Byers reacquired the coin and advocated it shouldn't have been given a "Genuine" label as there are a few other high-profile straight-graded coins/patterns with post-Mint alterations. NGC agreed and straight-graded it at AU-53; he later sold the coin privately for \$400,000! (Source: MikeByers.com/6324417-001.html)

What the Planchet Was Intended to Become

Below is a 1913 Indian Head \$5 gold Half Eagle, which is likely what the planchet for the featured 1913 Buffalo nickel was supposed to become. Seeing that U.S. Mint control of gold and silver planchets was so tight even back then, it is unknown if this is a true error or a Mint-assisted coin. (Photos courtesy of PCGS®

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

New Edition of Bart's United States Paper Money Errors Available Now

UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

DR. FREDERICK J. BART

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

New From Krause Publications:

Strike It Rich With Pocket Change

Error Coins Bring Big Money

by Brian Allen & Ken Potter
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit krausebooks.com for more information.

MINT*ERROR*NEWS GLOSSARY

What Are Unique Coins?

Many numismatists, dealers and collectors consider unique coins to be the most coveted, prized and valuable. Many of these unique coins were documented by the U.S. Mint or one of the Mint Branches, while others have no documentation but there are logical assumptions as to how and why they were struck.

Some of the most famous U.S. coins were struck under mysterious circumstances and the story behind their production adds to their rarity, prestige and value. Examples are coins struck in proof where only one example is known, a special specimen striking struck with polished dies, while others are patterns, trial strikes, or mint error coins.

Here is the only known 1891-O Seated Liberty Dime struck in PROOF! Authenticated and certified by NGC as a Proof 66, this unique Branch Mint proof is a world-class rarity.

U.S. & WORLD MAJOR MINT ERRORS

World's Greatest Mint Errors
by Mike Byers

**NLG Award Winner:
Best World Coin Book**

Mike Byers was born in the coin business attending coin shows since he was six years old. When he was seventeen, he issued his first coin catalog. He has been a Market-Maker in U.S. Gold Coins and a dealer in major mint errors. In 1987 he offered limited partnerships and rare coin funds. He has written articles for The Coin Dealer Newsletter and has been featured on the front page of Coin World numerous times with his numismatic rarities. Mike Byers is a contributing author on mint errors for CoinWeek. He also assisted with the mint error section of Coin Facts on the PCGS website. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers has been a professional numismatist for forty years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.com.

Mike Byers is a life member of ANA since 1985, a charter member of NGC and a featured dealer/member of PCGS. He is also a life member of the Central States Numismatic Society and the Florida United Numismatists. He is a member of CDN Exchange (BYRS).
